Madhubani art or Mithila art is a unique art and it is believed that this art works were decorated in the marriage of Goddess Sita and God Ram in Hindu Mythological stories.

Lost In Yaba is about my time in Laos. I planned to travel for a year aroundthe world, but I ended up staying in Laos for eleven months, and then going back there again foranother four months. 'Yaba' is a popular drug in Laos, and in this story I show how this drug can takecontrol of both foreigners and locals. This book shows the lies and manipulation used by Lao peoplein the tourist area of Vientiane, and it shows the strange life that some foreigners lead in the Laos capital ofVientiane.

'The secret to my success is that I always managed to live to fly another day.'General Chuck Yeager was the fist man to fly faster than the speed of sound. He was also the World War II fighting ace who shot down a Messerschmitt jet with a prop-driven P-51 Mustang - Chuck Yeager is The Right Stuff.He first joined the US Air Force at eighteen, fresh from school, and by twenty-two had risen through the ranks on the wings of his heroic exploits dogfighting over the flak-filled skies of Nazi Europe. But it was in 1947 that Yeager achieved worldwide recognition as the first test pilot to smash the sound barrier, flying the super-secret Bell X-1 despite cracked ribs from a riding accident.This was truly the Golden Age of Aviation, the exciting leap into the supersonic era - the daredevil, death-defying days of the true winged heroes. And Chuck Yeager was there every step of the way - fighting and winning.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Complete Book of Classic MG Cars covers all the marque's collectible production saloons and sports cars, from the 14/28 and 14/40 sports cars to the iconic postwar convertibles like the MGA and MGB, as well as latter-day takes on the classic MG formula, such as the RV8. First produced in Oxford, England, in 1924, MG cars proved instantly appealing, with a cheeky spirit that would win the hearts of millions around the globe, not least of all in the United States. This was due in no small part to the fact that the price was as attractive as the styling and the performance. Inexpensive and fun became quintessential MG traits. In this installment of Motorbooks' Complete Book series, author Ross Alkureishi offers a chronological model-by-model marque history. Narratives discuss design, production, and technology, while specification tables highlight key technical and performance data. Hundreds of photos illustrate the vehicles and even include detail shots of engine bays and interiors. Originally formed as a side business, MG became one of the world's most recognized car brands. From prewar saloons to fast and affordable two-seat sports cars in the pre- and postwar periods, MG has exuded fun, thanks to models like the Midgets and Magnettes, the traditionally styled T-Types, and the vehicles that would become the marque's most recognizable: the MGA, MGB, and MGC. MG would undergo several ownership changes throughout the years, and Alkureishi expertly shows how different ownership groups affected MG cars, good or bad. Along the way, the company competed on racetracks around the world, and Alkureishi describes the most successful of these exploits in complementary sidebars. The Complete Book of Classic MG Cars is the essential guide to this important chapter in the history of motoring.

David Tremayne's acclaimed biography of Jochen Rindt was first published in 2010 and now, to honor the 50th anniversary of the Austrian's death, Evro is reviving the book in paperback form. Rindt was widely acknowledged as the fastest man in Formula 1 by the time he reached his peak in 1970, when he tragically lost his life at Monza in Italy, four races before the end of the season. Such was his pre-eminence that year that no rival could overcome his points total and he became the sport's only posthumous World Champion. As his close friend Jackie Stewart observed in this book's foreword, "David Tremayne is a wonderful writer who has done Jochen great justice in the words that he has chosen to depict a remarkable man and a remarkable career."
