Corruption in Africa makes a significant contribution to the study of the impacts and eradication of corruption in African societies. John Mukum Mbaku offers a comprehensive analysis of the causes of public malfeasance in African countries and provides a number of practical and effective policy options for change. This book demonstrates the destructive relationship between corruption and the abrogation of economic freedoms and entrepreneurship, a system that has clearly left Africa as one of the most deprived regions in the world. Utilizing the tools of public choice theory, Mbaku emphasizes the important role that institutions have in corruption control and he recommends reconstructive democratic constitutions as the most effective means of development. Until African states provide their people with institutional arrangements that adequately constrain the state and enhance wealth production,

This new edition of a 1999 classic shows how institutionalized corruption can be fought through sophisticated political-economic reform.

Corruption is a globalising phenomenon. Not only is it rapidly expanding globally but, more significantly, its causes, its means and forms of perpetration and its effects are more and more rooted in the many developments of globalisation. The Panama Papers, the FIFA scandals and the Petrobras case in Brazil are just a few examples of the rapid and alarming globalisation of corrupt practices in recent years. The lack of empirical evidence on corrupt schemes and a still

imperfect dialogue between different disciplinary areas and between academic and practitioners hinder our knowledge of corruption as a global phenomenon and slow down the adoption of appropriate policy responses. Corruption in the Global Era seeks to establish an interdisciplinary dialogue between theory and practice and between different disciplines and to provide a better understanding of the multifaceted aspects of corruption as a global phenomenon. This book gathers top experts across various fields of both the academic and the professional world – including criminology, economics, finance, journalism, law, legal ethics and philosophy of law – to analyze the causes and the forms of manifestation of corruption in the global context and in various sectors (sports, health care, finance, the press etc.) from the most disparate perspectives. The theoretical frameworks elaborated by academics are here

complemented by precious insider accounts on corruption in different areas, such as banking and finance and the press. The expanding links between corrupt practices and other global crimes, such as money laundering, fraud and human trafficking, are also explored. This book is an important resource to researchers, academics and students in the fields of law, criminology, sociology, economics and ethics, as well as professionals, particularly solicitors, barristers, businessmen and public servants.

Money makes the world go round - corruption The book presents the state of the art in studying the causes of corruption from a comparative perspective. Master's Thesis from the year 2018 in the subject Economics - International Economic Relations, grade: 1,0, Wiesbaden University of Applied Sciences, language: English, abstract: Corruption erodes the functioning of a state's essential organs, meaning its political, economic and social structures, and causes its norms and values to deteriorate, but more severely, it ultimately weakens the heart of good governance - the most feared enemy of corruption. Weakened by this disease, the state, however powerful its systems, becomes more vulnerable and exposed to a great variety of risk factors while

the malicious disease increasingly thrives, spreading through the organism and capturing the state, trapping it in a vicious circle. There is no country that is immune to this disease. Whether on the local, national or international stage, corruption wreaks its destructive work at all political, economic and social levels. Public procurement embodies a large, if not the largest part of national economies. Every year, trillions of dollars are deployed for the acquisition of goods, services and works, ranging from those intended to serve basic needs such as education or public health services to those destined for giant infrastructure projects; the latter, large budgets make them tempting targets for corruption, which is often shielded behind the complicated and opaque procurement process. This results in wasteful spending, transforming public procurement, a powerful instrument for the

promotion of prosperous economic development, into a harmful growth inhibitor. Public procurement belongs to the group of government activities that are worst affected by corruption. Corruption, seen as a key governance challenge, puts a detrimental strain on the functioning of a sound public procurement system. A public procurement system affected by corruption suffers from a wide range of symptoms; for instance, the quality of public projects may be reduced and public funds may be diverted from projects that are essential for the achievement of social and economic goals, resulting in rising poverty and inequality. Even worse, corruption undermines the rule of law and erodes public trust and confidence in public bodies and in the market, ultimately impeding economic growth and development. Why and how does corruption enter the sphere of public procurement? Why is it essential to combat

corruption and how can this phenomenon be mitigated in the context of public procurement? The research objective of this thesis is to give answers to these questions.

Corruption in the sport industry is a pervasive issue that threatens the integrity of sport as an institution. From doping and match-fixing to money laundering, corruption should be a concern to anybody interested in sport policy, management, governance, or ethics. This is the first book to explore the complexity of sport corruption in terms of its conceptualisation, causes, consequences, and reform. The first part looks at the concept of sport corruption, while the second examines the causes of sport corruption from individual, organisational, industry-wide, and longitudinal viewpoints. The third part discussed is the consequences of sport

corruption and its impact on the global sport industry. Various approaches to regulatory reform are considered in the next part, as well as the challenges of combatting corruption in the sport industry. The final part assesses the current state of literature in this area and suggests opportunities for future research. Drawing on multidisciplinary case studies from across the world, this is a seminal contribution to the academic study of corruption in sport. It is important reading for all students and scholars of sport management, business, criminology, and law.
