Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region.

This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than forty-five years, pulls no punches.

Do you assume the products you buy, the food you eat, the medicines you take, and the cars you drive are safe? Think again. We're exposed on a daily basis to life-threatening hazards of which we're often unaware. From defective airbags that can explode and kill us to poisonous additives in food, we're often the unknowing victims of corporate malfeasance and shamefully incompetent government oversight. In this hard-hitting expose', Dr. Gerald M. Goldhaber examines the outcomes when corporate profits trump public safety. He uncovers the dismal history of government regulatory agencies that are supposed to protect us, but instead appoint leaders who come and go from the same industries they're tasked to regulate. And while our modern conveniences make life easier and more enjoyable than previous generations, we also face new dangers of the digital age. The hacking of autonomous cars, misuse of private information collected by smart devices, and renegade programming glitches in smart homes and offices are just a few scenarios confronting us in the near future. The companies who produce these innovations need to ensure they're fail-safe, or face hefty lawsuits if and when things go wrong. Principled disclosure of hidden hazards is an industry - and regulatory - necessity. We can only make informed choices and avoid needless injury and death when we know all the facts. Dr. Goldhaber recommends twelve steps to take control of our safety, and outlines a model of corporate responsibility and government regulation that balances public safety measures and company profits to the benefit of all.

Winner of the Management and Leadership Textbook category at the CMI Management Book of the Year Awards 2013/14, International Management explores management opportunities in encounters across the world between national, organizational, political, professional and social cultures. It is soundly based theoretically and supported with real-life international examples from contemporary events and situations, exploring contemporary and historical material to provide insights for today's managers who find themselves dealing with diversity and difference. From a historical perspective and a uniquely cross-disciplinary approach, Elizabeth Christopher identifies the major leadership styles that continue to characterise people across regions, nations, communities and organisations, within groups and as individuals. International Management is a practical and comprehensive textbook for successful negotiation in a world rich not only in cultural diversity but also in convergence. It also covers the ethical, moral and environmental ramifications of business today and the corporate leaders who are learning to manage their businesses across nations and continents, not only profitably but in ways that contribute to societies overall through economic, environmental and social action. International Management is an indispensable guide for students and practitioners to key issues of cross-cultural management, suitable to accompany online or private studies, or a teaching unit within professional and university graduate studies of international management.

DHM and Posturography explores the body of knowledge and state-of-the-art in digital human modeling, along with its application in ergonomics and posturography. The book provides an industry first introductory and practitioner focused overview of human simulation tools, with detailed chapters describing elements of posture, postural interactions, and fields of application. Thus, DHM tools and a specific scientific/practical problem – the study of posture – are linked in a coherent framework. In addition, sections show how DHM interfaces with the most common physical devices for posture analysis. Case studies provide the applied knowledge necessary for practitioners to make informed decisions. Digital Human Modelling is the science of representing humans with their physical properties, characteristics and behaviors in computerized, virtual models. These models can be used standalone, or integrated with other computerized object design systems, to design or study designs, workplaces or products in their relationship with humans. Presents an introductory, up-to-date overview and introduction to all industrially relevant DHM systems that will enable users on trialing, procurement decisions and initial applications Includes user-level examples and case studies of DHM application in various industrial fields Provides a structured and posturography focused compendium that is easy to access, read and understand

The guide provides business profiles, hiring and workplace culture information on more than 30 top employers, including Alcoa, General Electric, Honeywell and more.

Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.
