Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

The True Story of Anti-Abortion Killer James Kopp Sniper opens in October 1998 near Buffalo, NY. A man is alone in the dark in a forest. He clutches an assault rifle and is thinking about his mission. "You can cut holes in the fences around the death camps," he thinks. "A trickle of relief in the abortion holocaust. It is your duty to do it." He nestles the rifle into his shoulder and shoots at his target through the back window of a house, then flees. Barnett Sepia, a doctor who provides abortions, is fatally wounded. The shooter is James Kopp, the son of a Marine, who came to embrace the pro-life cause

and ultimately the notion of "justifiable homicide: against abortion providers. Kopp fancies himself a lone wolf in the movement; a celibate man driven to "defend the unborn." He is nicknamed "Atomic Dog" in the movement and helps orchestrate assaults on abortion clinics. As the story unfolds, he becomes the central figure in an international manhunt for multiple shootings in Canada. On the FBI's Top Ten Most Wanted list, Kopp flees to Mexico, Ireland, and France. Award-winning journalist Jon wells followed Kopp's footsteps, traveled to his hometown, and interviewed investigators in the U.S., Canada, Ireland, and France to tell this gripping detective story and dark psychological drama.
