The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

The emergence of the internet and developments in educational software have changed the way teachers teach and the way students learn. There has been a substantial increase in the quantity, quality, and

diversity of educational material available over the internet or through the use of satellite video and audio linkups. These technologies have allowed new learning methods and techniques to reach a greater geographic region and have contributed to the global transformation of education. The Roles of Technology and Globalization in Educational Transformation is an essential academic book that provides comprehensive research on issues concerning the roles of technology and globalization in educational transformation and the challenges of teaching and learning in various cultural settings and how they were resolved. It will support educational organizations that wish to find, create, or adapt technology for use in their institution. Featuring a broad range of topics such as public administration, educational technology, and higher education, this book is essential for teachers, deans, principals, school administrators, IT specialists, curriculum developers, instructional designers, higher education staff, academicians, policymakers, researchers, and students.

This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on

In the Kimberley region of Australia, water is plentiful, but in the city, it is precious and political. Government minister Michael Money has cooked up a secret plan to bring water from the monsoonal north of Australia to the south, but he needs to find out what opposition he might face around the river valley. He sends his chief of staff Kate Kennedy - young, focused, and well-versed in power play - and political fixer Jack Cole on a 'fact-finding' trip. Ex-greenie Dylan Ward is their guide; well-regarded by both the mining industry and Aboriginal elder Vincent Yimi. Dylan is unaware that he has been

compromised until their journey takes some unexpected turns. As they travel through the wild river country, Kate begins to see Dylan in a new light. When she changes sides to be with Dylan and safeguard a precious and sensitive area that she has so quickly come to love, her political edge comes into play. As the River Runs is a powerful ode to one of Australia's most stunning regions. The story is written by Stephen Scourfield, who knows the landscape intimately and writes with red dust in his veins. The book is hopeful for change, both in people and in government policy, and is highly relevant, covering issues such as: water shortages, the environment, resourcing remote communities, solar power, politics, Aboriginal culture, mining, etc. [As the River Runs is a loose sequel to Scourfield's previous novel, Other Country (ISBN 978 1 74258 503 1), which sold 7,000 copies. Other Country won the Western Australian Premier's Book Award in 2007, was shortlisted in the Commonwealth Writers Prize, and was longlisted for the 2009 International IMPAC Dublin Literary Award. Scourfield is also a recipient of a United Nations Media Award.]

Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high

drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process †“ methods, copyright, length of print runs, effective procurement practices †“ rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

This book features essays that untangle, express and discuss issues in and around the intersections of politics, social justice, intolerance, terrorism, minorities, poverty, and education, and as they relate to the two concepts of radicalisms and conservatism in Africa.
