The shell-bearing sites of the middle Green River region in western Kentucky have played a defining role in how archaeologists conceptualize Middle Holocene fisher-hunter-gatherers. This book presents new interpretations of data gathered over a 30-year period about the Native American people who lived along the middle Green River from about 4500 to 2000 B.C. Interdisciplinary by design, the Shell Mound Archaeological Project directed by William Marquardt and Patty Jo Watson focused first on subsistence, particularly the emergence of indigenous agriculture in eastern North America. As more was learned, the research focus broadened to include not only archaeobotany and zooarchaeology, but also geoarchaeology, pedoarchaeology, archaeomalacology, paleodemography, dental biology, and other specialties. Results of all these investigations are included, as well as comparative studies of stone, bone, and shell artifacts. Accounts of how archaeologists have revised their interpretations of the Green River sites over time provide insight into the history of archaeology in the Mid-South and Midwest. In the final chapter, the co-editors synthesize their findings and suggest research directions for the future. Richly illustrated with over 240 photos and drawings, this volume will serve as an invaluable reference work for all those interested in eastern United States archaeology.

Preparing Heirs discloses the surprising findings from the authors' research into the legacies of 3,250 wealthy families. With extraordinary insight, they reveal what the relatively small number of successful families had in common-how they achieved and maintained family harmony, and ensured the smooth transition of their wealth to well-adjusted heirs. They also warn of the wide range of factors that cause the majority of wealthy families to fail in their transition. Preparing Heirs offers clear, concise, well-organized, and easy-to-follow instructions that will enable you to evaluate your plan for transitioning family wealth. Preparing Heirs is an assessment tool that can be used in conjunction with the services of qualified professionals such as attorneys and accountants. It addresses the major causes for the 70% failure rate in estate transitions, which lie within the family itself and are within the family's control. This book can help you develop a plan to transmit the family values underlying the accumulation of wealth and prepare your heirs to be good stewards and thoughtful administrators of that wealth.
