*Provides clear and concise expert responses to questions that early childhood and elementary education administrators and preschool directors ask about educating young children who are learning through two languages"--

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

A well-established reference, **INFANTS AND TODDLERS: CURRICULUM AND TEACHING, 7TH EDITION**, presents a child-centered approach for the child care provider called conscious care giving. This important and well-rounded approach encourages a sense of empowerment and focuses on the respectful, purposeful, and careful handling of children in any child care setting. Reader friendly, realistic, and easily applicable to real life, the book emphasizes the child's growth and development, helping readers discover how they can best and most effectively influence that development. Overviews of key child care philosophies as they relate to the child, the caregiver, and parent involvement are presented along with case studies and personal perspectives of child care professionals, helping readers translate theory into practice. The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explainin appropriate practice.

As the only text of its kind, this book provides in-depth information about Vygotsky's theories, neo-Vygotskians' findings, and concrete explanations and strategies that instruct teachers how to influence student learning and development. Key changes to this edition include a new chapter on dynamic assessment, separate and expanded chapters on developmental accomplishments of infants and toddlers, preschool/kindergarten, and primary grades and on supporting those accomplishments, and elaborations of Vygotsky's ideas from neo-Vygotskians from Russia. **FEATURES:** Written for the beginning student, the book provides a clear discussion of Vygotskian principles including...a historical overview and a complete chapter on the " Zone of Proximal Development. " (ZPD). Each section of the book builds on the other...framework, strategies, and applications of the Vygotskian approach. The work of Vygotsky is compared in a fair and balanced way with the work of Piaget. Examples and activities have been class-tested in a variety of classroom environments including a Head Start program, private preschool, and in the Denver Public Schools.
