Illustrated with 10 images. This book will be a descriptive grammar of the Esperanto language invented by L. L. Zamenhof, which will be complete and comprehensive in regards to a) the grammar of Esperanto as first outlined by Zamenhof in *Fundamento de Esperanto* and other foundational documents, and b) Esperanto as it is spoken today by the most committed Esperantists. (Proposed reforms to the Esperanto language will be discussed if they have serious support from a significant fraction of Esperanto enthusiasts). This book was started practically on a dare from the August 2006 issue of *Bob's Poetry Magazine*, in which Robert Happelberg boasted that he could print a complete and comprehensive grammar of Esperanto in just one 6 by 7 inch page. While this is obviously wrong, it's not too far off the mark. When completed, this book will require several standard size (8.5 by 11 in the USA) pages, but will still be much shorter than a complete grammar of a natural language like English or Slovene. In view of this goal, the number of examples provided for each concept will be kept to a bare minimum. Those wishing to build their Esperanto vocabularies are also referred to the Esperanto textbooks. It is acceptable in the beginning to word the text in an accessible manner like in a textbook, but the goal should be for all the text to be technical with a full command of linguistic jargon.

Every year, the U.S. Army must select from an applicant pool in the hundreds of thousands to meet

annual enlistment targets, currently numbering in the tens of thousands of new soldiers. A critical component of the selection process for enlisted service members is the formal assessments administered to applicants to determine their performance potential. Attrition for the U.S. military is hugely expensive. Every recruit that does not make it through basic training or beyond a first enlistment costs hundreds of thousands of dollars. Academic and other professional settings suffer similar losses when the wrong individuals are accepted into the wrong schools and programs or jobs and companies. Picking the right people from the start is becoming increasingly important in today's economy and in response to the growing numbers of applicants. Beyond cognitive tests of ability, what other attributes should selectors be considering to know whether an individual has the talent and the capability to perform as well as the mental and psychological drive to succeed?

Measuring Human Capabilities: An Agenda for Basic Research on the Assessment of Individual and Group Performance Potential for Military Accession examines promising emerging theoretical, technological, and statistical advances that could provide scientifically valid new approaches and measurement capabilities to assess human capability. This report considers the basic research necessary to maximize the efficiency, accuracy, and effective use of human capability measures in the military's selection and initial occupational assignment process. The research recommendations of Measuring Human Capabilities will identify ways to supplement the Army's enlisted soldier accession system with additional predictors of individual and collective performance. Although the primary audience for this report is the U.S. military,

this book will be of interest to researchers of psychometrics, personnel selection and testing, team dynamics, cognitive ability, and measurement methods and technologies. Professionals interested in of the foundational science behind academic testing, job selection, and human resources management will also find this report of interest.

This is not a book. This is an interactive experience. There are 10 horror short stories inside, sure, but that's not the only thing lurking within these pages. Check out what this beta reader had to say: "I thought I was buying a book of short stories. I didn't realize that what I would read would have such depth of experience. Most of the stories were amazing, but I have to be honest. When dealing with anthologies that contain multiple authors, there are always a few clunkers and this book is no different. The puzzles, the death override (Do the confirmation. It's pretty cool), the coupon (It works! And you get a surprise back too!) and the amount of thought put into this more than made up for any shortcomings one or two of the stories might have had. I feel as though the Bloodworth sat down and really thought about the type of experience he thought the reader would like to have while going through the book. Amazing." Ann P. Beta reader Ann is correct about the focus on reader experience. I wanted the reader to have something that they weren't quite sure about. I wanted to hide things inside the pages. I wanted people to think of the Boothworld Industries

Initiation Kit as less of a book and more of an interactive experience with a paranormal corporation called Boothworld Industries. "Okay. First, I want to say that I'm a huge Bloodworth fan. I've followed him since he started writing creepypastas for reddit's nosleep subreddit, back before it was filled with the stuff that's in there now. His stories were among the few that focused more on characters and plot than just gore and scares. I don't even like scary stories, but his writing pulled me in and kept me hooked. His stories made you fall in love with the characters he wrote. That sucked because you didn't want anything bad to happen to them, which usually did. His stories also had an air of reality to them. Even though you knew what you were reading couldn't be true, his words would make you question that very notion. Like I said, I'm a superfan. I loved all of Bloodworth's stories in this book. How could anyone not? He created Boothworld Industries and it shows. There were a few authors that gave him a run for his money though. Namely Ross Baxter and Stacie Savage. Now I don't want to be mean, but there was also one story I just didn't like at all. It seemed like very little thought had been put into it. Oh well. I've yet to read a book that was 100% perfect, but this book, with all the extra goodies you find, comes closer than most." Bri K. Beta reader I really wanted the reader to walk away from this experience feeling as if they'd received something more than a book. I wanted to create lasting memories. That's why so much time and effort was put into it. Sure, I could've just thrown the stories together, but it wouldn't have been as powerful as I wanted it to be. "Jesus, dude. I've never been more paranoid in my life. Every time my phone rings I say a little prayer that the number that

appears won't read 630-296-7536. Boothworld Industries is something else..." Jon S. Beta reader I could tell you more, but now it's time for you to discover Boothworld Industries for yourself.
