The French Defence provides a good choice for players who want to create a dynamic, unbalanced situation out of the opening but balk at the level of study required to master the ferociously complex Sicilian Defence. The French is one of Black's soundest defences to 1 e4 and is very popular at all levels. White often advances with the space-gaining e4-e5 which, in principle, will generate a small advantage.

It's not easy finding a good opening to play against 1 e4, especially if you don't have endless time available to study the latest theoretical developments. If you choose fashionable openings, it's often a necessity to keep pace with modern theory if you want to succeed with Black. This book provides a solution. Neil McDonald advocates his favourite opening - the very popular French Defence - but chooses a repertoire for Black that requires only the minimum amount of move memorization. The lines he selects are very easy to learn and play - perfect for those who are unwilling to be slaves to opening theory. But there's also something here for more experienced players, as McDonald goes on to offer a second repertoire based on counter-attacking lines against 3 Nc3 and 3 Nd2. *An easy-to-learn defence against 1 e4*Provides solutions to all of White's options*Written by a world-renowned expert on the French*Ideal for improvers, club players and tournament players English Grandmaster Neil McDonald is an experienced and successful player on the international chess circuit. He is a respected chess coach, who has trained many of the UK's strongest junior players. McDonald is also a talented chess writer and has many outstanding works to his name.

In this user-friendly book, International Master Byron Jacobs revisits the basic principles behind the French Defence and all of its variations. Throughout the reader is helped along by a wealth of notes, tips, warnings and exercises.

The French Defence is a classical opening that has featured in the repertoire of many elite grandmasters. Black generally concedes a slight spacial disadvantage early but in return gains a sound structure and middlegame opportunities to undermine the white centre. A close study of the French Defence can be very rewarding for all players as the structures and themes that arise are found in numerous other openings. In this book grandmaster Damian Lemos guides the reader through the complexities of this dynamic opening and explores all the important variations. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional

assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. * Essential guidance and training in the French Defence * Analyses all key variations * Utilizes an ideal Q+A approach to chess study

A chess book on the openings, aimed at a club audience.

Grandmaster Simon Williams has played the Classical Dutch for over twenty years. It remains his favourite opening and has featured in some of his greatest individual results, including a win over World Championship finalist Boris Gelfand. In this book, Williams examines the Classical Dutch in great depth. He also presents a complete repertoire for Black with the Dutch Defence, which is based on his own repertoire he has used successfully at grandmaster level for many years. As well as presenting the latest theory and revealing his new ideas in the key lines, Williams highlights the main tactical and strategic ideas for both sides and covers important issues such as move orders. Each chapter includes a series of tests at the end, so that readers are able to assess how well they have understood the main concepts. This book tells you everything you need to know about successfully playing the Classical Dutch. A Dutch repertoire against 1 d4, 1 c4 and 1 Nf3 Written by a world-renowned Classical Dutch expert Packed with new ideas and critical analysis

Checkmating the enemy king is the ultimate goal in chess. In this book Simon Williams helps readers to practice and improve their skills in this vital area of practical chess. A mating attack typically involves a build-up of forces, followed by an opening of lines, often involving a sacrifice. Once the enemy king is exposed, it is either checkmated, or only saved at a great cost in material. The puzzles in this book are pertinent to all these phases, and involve questions of where to attack and what pieces to use. Topics include: Attacking the king caught in the centre; Central breakthrough; Standard sacrifices against the castled king; Chasing the king; Endgame mates; Combinative themes.

The French Defense is one of the most solid and strategically rich responses to 1.e4. Many chess opening lines have been analyzed to death by computer, but the French is relatively resistant to this growing trend, as the characteristic blocked pawn centre leads to situations where a player with superior understanding can overcome an opponent whose expertise lies in computer-assisted preparation. Acclaimed authors Ntirlis and Aagaard present a complete repertoire for Black based on 3.Nc3 Nf6 and 3.Nd2 c5. With many new discoveries and detailed explanations of positional and strategic motifs, this book is essential reading for those playing this complex opening with either color.

Cyrus Lakdawala presents an aggressive opening repertoire, based on the Veresov Opening. This repertoire is perfect for those who have little time for study but enjoy taking opponents out of their comfort zones.
