By building a big-cube small block, you can have all the additional torque and horsepower of a big block, without all the extra weight, expense, and effort. In this all-new color edition, Graham Hansen takes a step-by-step approach to selecting the best OEM or aftermarket block, crank, rods, and pistons to construct your big-inch short block. He also discusses how to select the best heads, cam, induction and exhaust systems, specifically for a big-inch engine. In addition, the final chapter includes seven different combinations for big-inch power, complete with dyno graphs!

The LNCS Journal on Data Semantics is devoted to the presentation of notable work that addresses research and development on issues related to data semantics. Based on the highly visible publication platform Lecture Notes in Computer Science, this journal is widely disseminated and available worldwide. The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain-specific applications of semantic knowledge.
