development and
design of ground
vehicles that meet
these requirements.

As in previous
editions, this book
focuses on applying
engineering principles
to the analysis of
vehicle behavior. A
large number of

The rate of growth of stainless steel has outpaced that of other metals and alloys, and by 2010 may surpass aluminum as the second most widely used metal after carbon steel. The 2007 world production of stainless steel was approximately

30,000,000 tons and has nearly doubled in the last ten years.

This growth is occurring at the same time that the production of stainless steel continues to become more consolidated. One result of this is a more widespread need to understand stainless steel with
