Written for professionals in both general and special education, this book is a complete description if applied behavior analysis and how it can be used with students displaying a range of excessive and deficit behaviors. In addition to traditional topics covered in other applied behavior books, this reference devotes substantial attention to preventing problems through anecdotal control, social skill development and emotional learning. Topics include increasing appropriate behavior through related personal characteristics; increasing appropriate behavior through consequence control; positive approaches to decreasing inappropriate behavior; punishment; graphing, and more. Behavior analysts, teachers of any level.

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

In this important book, successful organizations!including well-known companies such as Agilent Technologies, Corning, GE Capital, Hewlett
