Joseph Heller's *Catch-22* has been interpreted from many different vantage points in the nearly fifty years since it was first published. One approach that has not been effectively used has been to consider the influence of Homer's *Iliad* on Heller's novel. From teaching a Humanities seminar in war literature some years ago I had become convinced that this

Homeric influence existed and I wrote to the late Mr. Heller to see if he would confirm this impression of mine. In a letter which I received from him in 1994 he stated that he had been thinking about the Iliad all of the time he was writing Catch-22 but wanted to avoid obvious comparisons. He confirmed to me his interest in the Iliad in personal conversations I had the privilege to have with him in 1997. In an interview which Mr. Heller had with the journal Contemporary Literature in 1998, he was asked "Were you thinking of Homer's ending when you wrote the conclusion to Catch-22?" He replied, "Very much so." This study offers a strong argument for an original interpretation of the intriguing relationship between Catch-22 and the Iliad.

When it comes to parenting, sometimes you have to trust your gut. With her first book, *It's OK Not to Share*, Heather Shumaker overturned all the conventional rules of parenting with her "renegade rules" for raising competent and compassionate kids. In *It's Ok To Go Up the Slide*, Shumaker takes on new hot-button issues with renegade rules such as: - Recess Is A Right - It's Ok Not To Kiss Grandma - Ban Homework in Elementary School - Safety Second - Don't Force Participation Shumaker also offers broader guidance on how parents can control their own fears and move from an overscheduled life to one of more free play. Parenting can too often be reduced to shuttling kids between enrichment classes, but Shumaker challenges parents to reevaluate how they're spending their precious family time. This book helps

Parents help their kids develop important life skills in an age-appropriate way. Most important, parents must model these skills, whether it's technology use, confronting conflict, or coping emotionally with setbacks. Sometimes being a good parent means breaking all the rules.

Parenting can be such an overwhelming job that it's easy to lose track of where you stand on some of the more controversial subjects at the playground (What if my kid likes to rough house—isn't this ok as long as no one gets hurt? And what if my kid just doesn't feel like sharing?). In this inspiring and enlightening book, Heather Shumaker describes her quest to nail down "the rules" to raising smart, sensitive, and self-sufficient kids. Drawing on her own experiences as the

mother of two small children, as well as on the work of child psychologists, pediatricians, educators and so on, in this book Shumaker gets to the heart of the matter on a host of important questions. Hint: many of the rules aren't what you think they are! The "rules" in this book focus on the toddler and preschool years—an important time for laying the foundation for competent and compassionate older kids and then adults. Here are a few of the rules: " It's OK if it's not hurting people or property " Bombs, guns and bad guys allowed. " Boys can wear tutus. " Pictures don't have to be pretty. " Paint off the paper! " Sex ed starts in preschool " Kids don't have to say "Sorry." " Love your kid's lies. IT'S OK NOT TO SHARE is an essential resource for any parent hoping to avoid PLAYDATEGATE (i.e. your child's behavior

This book deals with all the tasks related to brick and stone masonry structures, from the initial identification of defects and their diagnosis to their treatment and monitoring of its cost-effectiveness. It is written in the context of bridges and their associated retaining walls in the U.K.

home. The predictable results: stress and conflict, frustration and exhaustion. Parents respond by reassuring themselves that at least the benefits outweigh the costs. But what if they don't? In *The Homework Myth*, nationally known educator and parenting expert Alfie Kohn systematically examines the usual defenses of homework--that it promotes higher achievement, "reinforces" learning, and teaches study skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even demand a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time and our families with

more conflict. Pointing to parents who have fought back -- and schools that have proved educational excellence is possible without homework -- Kohn shows how we can rethink what happens during and after school in order to rescue our families and our children's love of learning.

This work is a brief yet comprehensive introduction to the thought-provoking field of business ethics. It is organized into three parts that cover the role of business in society, the ethics of internal management, and the challenges of international business.

lines or machines. As pervasive technology ensures the rapid spread of pop culture and information access, few corners of the planet remain untouched. One of those few is Kizuldah, Karzistan - a tiny rice-farming village, predominantly Chinese Buddhist but with a strong Muslim presence, among whom sharply intelligent though illiterate Mae Chung, a self-styled fashion expert guiding the village women in dress, make-up and hairstyling, is an informal leader. When the UN decides to test the radical new technology Air, Mae is boiling laundry and chatting with elderly Mrs Tung. The massive surge of Air energy swamps them, and when the test is finished, Mrs Tung is dead, and Mae has absorbed her 90 years of memories. Rocked by the unexpected deaths and disorientation, the UN delays fully implementing Air, but Mae

sees at once that her way of life is ending. Half-mad, struggling with information overload, the resentment of much of the village, and a complex family situation, she works fiercely to learn what she needs to ride the tiger of change.

The Rebel is the memoir of a revolutionary woman, Leonor Villegas de Magnon (1876-1955), who was a fiery critic of dictator Porfirio Diaz and a conspirator and participant in the Mexican Revolution. Villegas de Magnon rebelled against the ideals of her aristocratic class and against the traditional role of women in her society. In 1910 Villegas moved from Mexico to Laredo, Texas, where she continued supporting the revolution as a member of the Junta Revolucionaria (Revolutionary Council) and as a fiery editorialist in Laredo

newspapers. In 1913, she founded La Cruz Blanca (The White Cross) to serve as a corps of nurses for the revolutionary forces active from the border region to Mexico City. Many women like Villegas de Magnon from both sides of the border risked their lives and left their families to support the revolution. Years later, however, when their participation had still been unacknowledged and was running the risk of being forgotten, Villegas de Magnon decided to write her personal account of this history. The Rebel covers the period from 1876 through 1920, documenting the heroic actions of the women. Written in the third person with a romantic fervor, the narrative interweaves autobiography with the story of La Cruz Blanca. Until now Villegas de Magnon's written contributions have remained virtually unrecognized -

peripheral to both Mexico and the United States, fragmented by a border. Not only does her work attest to the vitality, strength and involvement of women in sociopolitical concerns, but it also stands as one of the very few written documents that consciously challenges stereotyped misconceptions of Mexican Americans held by both Mexicans and Anglo-Americans.

Parenting and education expert Alfie Kohn tackles the misconception that overparenting and overindulgence has produced a modern generation of entitled children incapable of making their way in the world.
