This edition of our successful series to support the Cambridge IGCSE Physics syllabus (0625) is fully updated for the revised syllabus for first examination from 2016. Mathematics is an integral part of scientific study, and one that students often find a barrier to progression in science. Students can find it difficult to apply maths knowledge to science scenarios, even if they have encountered the maths concept previously. The Maths Skills for Cambridge IGCSE Physics write-in workbook allows students to practise their maths skills in science contexts. This resource has been written in collaboration with the Association for Science Education (ASE), based on research carried out with the Nuffield Foundation. The accompanying teacher's guide provides support for teachers to teach mathematical concepts in science lessons.

Stephen Pople, one of today's most respected science authors, has created a totally new physics book to prepare students for examinations. Complete Physics covers all syllabuses due to a unique combination of Core Pages and Further Topics. Each chapter contains core material valid for all syllabuses. Further Topics at the end can be selected to provide the right mix of pages for the syllabus you are teaching.

Key Points:

- Totally new book constructed from an analysis of all GCSE Physics syllabuses including IGCSE, CXC, and O'Level
- Sets the traditional principles of physics in a modern and global perspective and uses illustrations with a worldwide context
- Extra topics to give a truly rounded curriculum
- Double-page spread format
- Ideal for those students intending to take physics to a more advanced level
