New York Times bestselling author Douglas Adams and zoologist Mark Carwardine take off around the world in search of exotic, endangered creatures. Join them as they encounter the animal kingdom in its stunning beauty, astonishing variety, and imminent peril: the giant Komodo dragon of Indonesia, the helpless but loveable Kakapo of New Zealand, the blind river dolphins of China, the white rhinos of Zaire, the rare birds of Mauritius island in the Indian Ocean. Hilarious and poignant—as only Douglas Adams can be—Last Chance to See is an entertaining and arresting odyssey through the Earth's magnificent wildlife galaxy. Praise for Last Chance to See "Lively, sharply satirical, brilliantly written . . . shows how human care can undo what human carelessness has wrought."—The Atlantic "These authors don't hesitate to present the alarming facts: More than 1,000 species of animals (and plants) become extinct every year. . . . Perhaps Adams and Carwardine, with their witty science, will help prevent such misadventures in the future."—Boston Sunday Herald "Very funny and moving . . . The glimpses of rare fauna seem to have enlarged [Adams's] thinking, enlivened his world; and so might the animals do for us all, if we were to help them live."—The Washington Post Book World "[Adams] invites us to enter into a conspiracy of laughter and caring."—Los Angeles Times "Amusing . . . thought-provoking . . . Its details on the heroic efforts being made to save these animals are inspirational."—The New York Times Book Review

Already a classic of war reporting and now reissued as a Grove Press paperback, *Black Hawk Down* is Mark Bowden's brilliant account of the longest sustained firefight involving American troops since the Vietnam War. On October 3, 1993, about a hundred elite U.S. soldiers were dropped by helicopter into the teeming market in the heart of Mogadishu, Somalia. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take an hour. Instead, they found themselves pinned down through a long and terrible night fighting against thousands of heavily armed Somalis. The following morning, eighteen Americans were dead and more than seventy had been badly wounded. Drawing on interviews from both sides, army records, audiotapes, and videos (some of the material is still classified), Bowden's minute-by-minute narrative is one of the most exciting accounts of modern combat ever written—a riveting story that captures the heroism, courage, and brutality of battle.

A look at the German High Command during World War II challenges the myth that the German Generals could have won the war had Hitler not interfered, and maps out the history and the personalities of the German Command Structure.

Detention and confinement—of both combatants and large groups of civilians—have become fixtures of asymmetric wars over the course of the last century. Counterinsurgency theoreticians and practitioners explain this dizzying rise of detention camps, internment centers, and enclavisation by arguing that such actions "protect" populations. In this book, Laleh Khalili counters these arguments, telling the story of how this proliferation of concentration camps, strategic hamlets, "security walls," and offshore prisons has come to be. Time in the Shadows investigates the two major liberal counterinsurgencies of our day: Israeli occupation of Palestine and the U.S. War on Terror. In rich detail, the book investigates Abu Ghraib, Guantánamo Bay, CIA black sites, the Khiam Prison, and Gaza, among others, and links them to a history of colonial counterinsurgencies from the Boer War and the U.S. Indian wars, to Vietnam, the British small wars in Malaya, Kenya, Aden and Cyprus, and the French pacification of Indochina and Algeria. Khalili deftly demonstrates that whatever the form of incarceration—visible or invisible, offshore or inland, containing combatants or civilians—liberal states have consistently acted illiberally in their counterinsurgency confinements. As our tactics of war have shifted beyond slaughter to elaborate systems of detention, liberal states have warmed to the pursuit of asymmetric wars. Ultimately, Khalili confirms that as tactics of counterinsurgency have been rendered more "humane," they have also increasingly encouraged policymakers to willingly choose to wage wars.

The complex material histories of the Nintendo Entertainment System platform, from code to silicon, focusing on its technical constraints

and its expressive affordances. In the 1987 Nintendo Entertainment System videogame *Zelda II: The Adventure of Link*, a character famously declared: I AM ERROR. Puzzled players assumed that this cryptic message was a programming flaw, but it was actually a clumsy Japanese-English translation of "My Name is Error," a benign programmer's joke. In *I AM ERROR* Nathan Altice explores the complex material histories of the Nintendo Entertainment System (and its Japanese predecessor, the Family Computer), offering a detailed analysis of its programming and engineering, its expressive affordances, and its cultural significance. Nintendo games were rife with mistranslated texts, but, as Altice explains, Nintendo's translation challenges were not just linguistic but also material, with consequences beyond simple misinterpretation. Emphasizing the technical and material evolution of Nintendo's first cartridge-based platform, Altice describes the development of the Family Computer (or Famicom) and its computational architecture; the "translation" problems faced while adapting the Famicom for the U.S. videogame market as the redesigned Entertainment System; Nintendo's breakthrough console title *Super Mario Bros.* and its remarkable software innovations; the introduction of Nintendo's short-lived proprietary disk format and the design repercussions on *The Legend of Zelda*; Nintendo's efforts to extend their console's lifespan through cartridge augmentations; the Famicom's Audio Processing Unit (APU) and its importance for the chiptunes genre; and the emergence of software emulators and the new kinds of play they enabled.
