Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences,

and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Chapter 5 seeks to give an accurate and fair presentation of the Arminian view(s), giving attention to the theological nuances among Arminians. Chapter 5 shows that there is diversity within Arminianism, so that there are those who hold to a "classical Arminian" view and there are those who hold to a Semi-Pelagian view. However, chapter 5 demonstrates that both views end up in the same place, namely, affirming the doctrine of synergism which makes God's grace contingent upon man's will. Chapter 6 is a biblical and theological critique of the Arminian view.

Chapter 6 shows that the Arminian doctrine of synergism is not found in Scripture, contradicts Scripture, and robs God of all his glory in salvation. Chapter 7 turns from the Arminian view to examine recent modified attempts to pave a middle way between Calvinism and Arminianism. Chapter 7 shows specifically that attempts at a middle way borrow from Arminianism and consequently fall prey to an erroneous interpretation of Scripture. Chapter 7 shows that a middle way is biblically impossible and it also robs God of all his glory in salvation. Chapter 8 concludes the dissertation by restating the

thesis, summarizing the biblical data, and arguing that only the Calvinist view can preserve the glory of God to save sinners. Three appendixes conclude the dissertation. Appendix 1 examines the Arminian and Calvinist views of the love of God and argues that divine love in Scripture is far more complex than the Arminian makes it out to be. God not only has a universal love for all people but a special, particular, and efficacious love only for the elect. Appendix 2 examines the Arminian and Calvinist views of the will of God and argues once again that the will of God in Scripture is far more

complex than the Arminian makes it out to be. Scripture shows, it is argued, that God not only has a moral or preceptive will as well as a will of disposition but also a will of decree by which he effectually ordains all that comes to pass. Appendix 3 looks at the relationship between effectual calling and regeneration in the Reformed tradition and the diversity that exists among the Reformed as to how exactly describe this relationship. Appendix 3 presents and critiques each view, but pays particular attention to Michael Horton's recent proposal for "covenant ontology and effectual calling."
