This book, first published in 1980, presents the findings of the SIPRI-organized 1979 international symposium on the destruction and conversion of chemical weapons. Thirty experts from 14 countries discussed the destruction and conversion of present stockpiles of chemical warfare agents and munitions; the destruction and conversion of CW research and development facilities; verification of compliance, and confidence-building measures facilitating verification; and the environmental and occupational health hazards involved in maintaining and in disposing of stockpiles of CW agents and munitions.

The Preparatory Manual of Chemical Warfare Agents Third Edition Volume 2 is the continuation of Volume 1, and includes many upgraded data and informational contents on the worlds most common Chemical Warfare Agents. These existing warfare agents in Volume 2 include updated toxicity data and information regarding environmental persistence, contamination degree, lethal dose, and biological routes of entry and bodily function. As well, each chemical entry includes updated molecular formulas for preparation and structure, 3D molecular images, molecular physical properties, and laboratory chemistry, procedures, and safety. The third edition Volume 2 includes brand new chapters and sections including: Chapter 11: Preparation of Nerve Agent Antidotes including complete laboratory preparation and biological methods of nerve agent antidotes. Section VI: EXPERIMENTAL CHEMICAL WARFARE AGENTS, AND "POTENTIAL" CHEMICAL WARFARE AGENTS, Chapter 12: The preparation of experimental specialty quaternary "nitrogen ion" chemical warfare nerve agents; Chapter 13: The preparation of intermediates used in the preparation of experimental and "Potential" warfare Nerve Agents; Chapter 14: The preparation of experimental and "potential" nerve agents (Non-quaternary "nitrogen" ion containing); Section VII: THE PREPARATION AND MILITARIZATION OF BZ Chapter 15: BZ; toxicity data and information regarding environmental persistence, contamination degree, lethal dose, and biological routes of entry and bodily function. As well, includes molecular formulas for preparation and structure, 3D molecular images, molecular physical properties, and laboratory chemistry, procedures, and safety. Complete preparation and methods of military weaponization; Section VIII: THE PREPARATION OF RICIN Chapter 16: Ricin; toxicity data and information regarding environmental persistence, contamination degree, lethal dose, and biological routes of entry and bodily function. As well, chemical entry includes molecular formulas for preparation and structure, 3D molecular images, molecular physical properties, and laboratory chemistry, procedures, and safety. Complete and in depth guide on the extraction, isolation, and military weaponization. Section IX: METHODS OF DISSEMINATION OF CHEMICAL WARFARE AGENTS AND USE, Chapter 17: Dissemination techniques and munitions including upgrades to methods of chemical dissemination i.e. chemical warfare munitions; Aerosol Techniques (pressure release systems), Aerosol Warfare agent compositions, Smoke generating techniques (pyrotechnic devices), Warfare agents and their pyrotechnic smoke producing compositions, Explosive techniques (explosives munitions), and Special techniques (atomizers, humidifiers, and foggers); and then a simple Reference guide. The Preparatory Manual of Chemical Warfare Agents Third Edition Volume 2 is an extremely valuable reference book used to teach scientific, laboratory, and toxicity data for students, researchers, government agencies, contractors, first responders, and military operatives.
