A Journey to Flanders and Holland in the year 1781, first published in 1797 in the Works of Sir Joshua Reynolds, is Reynolds's perceptive account of the pictures which he saw in the Austrian Netherlands, the United Provinces and the Rhineland in 1781. The Journey is here published separately for the first time, in a new edition which is also the first to include explanatory notes on the pictures mentioned by Reynolds and to illustrate all those which he discussed in any depth. Harry Mount provides an introduction which sets the Journey in its context and draws on unpublished material from Reynolds's notebooks to give insights into his critical procedures. All in all, this edition of the Journey makes an important contribution both to the history of the reception of Netherlandish art and to our understanding of the development of art theory and criticism in eighteenth-century England.

From individual, group, and community values through the mechanisms of societal change itself, this book provides fundamental coverage of this increasingly vital topic. Action items, reflection, and discussion questions throughout encourage students to think about how these concepts apply in their own lives. The Facilitator's Guide includes a wealth of activities, assignments, discussions, and supplementary resources to enrich the learning experience whether in class or in the co-curriculum. This new second edition includes student self-assessment rubrics for each element of the model and new discussion on the critical roles of leadership self-efficacy, social perspective, and social justice perspectives. Content is enriched with research on how this approach to leadership is developed, and two new chapters situate the model in a broader understanding of leadership and in applications of the model. The Social Change Model is the most widely-used leadership model for college students, and has shaped college leadership curricula at schools throughout the U.S. and other countries including a translation in Chinese. This book provides a comprehensive exploration of the model, with a practical, relevant approach to real-world issues. Explore the many facets of social change and leadership Navigate group dynamics surrounding controversy, collaboration, and purpose Discover the meaning of citizenship and your commitment to the greater good Become an agent of change through one of the many routes to a common goal The SCM is backed by 15 years of research, and continues to be informed by ongoing investigation into the interventions and environments that create positive leadership development outcomes.
