Hearth mounted or hole in the wall glass gas fires, featuring glass fronts, are the most efficient available for conventional chimney flue systems. With efficiencies up to 89%, their heat radiates directly into the room. Concentrated by the glass panel, these fires force more heat into the room with less escaping via the chimney.

This one-of-a-kind HVAC/R technical reference guide incorporates all the HVAC/R technical terms used in the industry today, and is an indispensable resource for professionals dealing with electricity, controls, refrigeration cycle, heating, psychometrics, boilers, heat pumps, heat transfer, load calculations and more. Covers the entire industry, providing the most comprehensive collection of HVAC/R terms available in one concise location. For those just starting in and seasoned veterans of the HVAC/R industry. The 71 pages of appendices include common industry association abbreviations, business, computer and medical terminology; area of circles; color codes for resistors; CFM tables, decibel ratings & hazardous time exposure of common noises, duct sizing, conversion charts and much, much more.

This book describes some of the improvements in natural gas technologies, covering both engineering concepts and products which have emerged, as well as important innovations to existing technologies. It includes analyses which identify the cost savings attributable to the technologies described.
