From the ethics of Caller ID to transmission of sexually explicit materials via Internet, the information age presents a barrage of ethical challenges. In this acclaimed twice-yearly journal, some of the brightest and most influential figures in the information sciences confront a broad range of these transdisciplinary issues.

This volume constitutes the refereed proceedings of the International Conference on Digital Enterprise and Information Systems, held in London during July 20 - 22, 2011. The 70 revised full papers presented were carefully reviewed and selected. They are organized in topical sections on cryptography and data protection, embedded systems and software, information technology management, e-business applications and software, critical computing and storage, distributed and parallel applications, digital management products, image processing, digital enterprises, XML-based languages, digital libraries, and data mining.
