This is the essential companion to Jeffrey Wooldridge's widely-used graduate text *Econometric Analysis of Cross Section and Panel Data* (MIT Press, 2001).

Already established as a leading graduate econometrics text, the book offers an intuitive yet rigorous treatment of two methods used in econometric research, cross section and panel data techniques. The numerous end-of-chapter problems are an important component of the book, encouraging the student to use the analytical tools presented in the text. This manual contains answers to selected problems, new examples, and supplementary materials designed by the author. Users of the textbook will find the manual a necessary adjunct to the book.
