For decades US politicians have been kicking the federal deficit and overspending can down the road. No politician can get elected by running on a platform that will honestly fix the US economy. At no time in history has it been more crucial than now for each of us to understand our government. In order to do so, we must understand economics, politics, and the difference between the two. We are the richest country in history but yet we sit on the edge of financial disaster. How can we expect that to change if voters don't understand the very basics of economics? There has never been a source of information on economics that people can easily understand. UNTIL NOW. Author Marshall Payn, with a degree in Economics from M.I.T., believes that the current presentation of economics in our educational system is the biggest obstacle in understanding economics. He developed his unique approach while working in the field of vocational education, i.e. getting fundamental information from one mind to another. In clear and simple terms, this book separates truth from emotion, economics from politics, and offers undeniable proof of our country's destiny if each of us continues to elect politicians while lacking a clear understanding of basic economic principles. If you think you understand economics, think again. This book is an eye opener, not only with its content, but because these concepts are so simple. What is truly amazing is that the knowledge in this book is not common knowledge. You cannot call yourself a responsible citizen unless you read How to Understand Economics in 1 Hour prior to voting in the 2012 US election. It will change the way you see the government, politicians, and the future of our country.

Show Students How Geography Affects Their Lives.

Sourcing Strategy is about sourcing as a long term strategic activity. Myopic purchasing management stops short with describing functional procedures and procedural innovations such as online order processing. The goal of this book is not merely to document sourcing strategy, but to provide the tools to determine it. Therefore, rather than merely describe common sourcing processes, the book takes a normative approach to sourcing strategy. It argues for a rational, complete and integrated process view. It supports its recommendations with logical arguments from an interdisciplinary and analytical approach grounded in microeconomics, law and business strategy. Part 1 of the book explains the economic and business principles that underlie sourcing strategies. It derives policies that guide viable strategies to meet sourcing goals. Part 2 applies these to creative designs for standard sourcing scenarios.

In Ethics in Economics, Jonathan B. Wight provides an overview of the role that ethical considerations play in economic debates. Whereas much of the field tends to focus on welfare outcomes, Wight calls for a deeper examination of the origin and evolution of our moral norms. He argues that economic life relies on three interrelated ethical systems: outcome-based, duty- and rule-based, and virtue-based. Integrating contemporary theoretical and applied research on ethics within a historical framework, Wight provides a thorough and accessible outline of all three schools, explaining how they fit or contrast with the economic welfare model. The book then uses these conceptual underpinnings to examine a range of contemporary topics, such as the 2008 financial crisis, the moral limits to markets, the findings of experimental economics, and the nature of economic justice. Wight's analysis is guided by the innovative concept of ethical pluralism—the recognition that each system has appropriate applications, and that no one prevails. He makes the case that considering a wider moral framework, rather than concentrating on utility maximization, can lead to a richer understanding of human behavior and better policy decisions. An incisive overview in a blossoming area of interest within Economics, this book is ideal for undergraduates or uninitiated readers who seek an introduction to this topic.
