This book contains a collection of high-quality papers describing the results of relevant investigations and cutting-edge technologies, aimed at improving key aspects of real life, including major challenges such as the development of smart cities, smart buildings, smart grids, and the reduction of the impact of human activities on the environment. Sustainability requires the use of green technologies and techniques and good practices. Artificial intelligence seems to be an appropriate approach to optimize the use of resources. The main focus of this book is the dissemination of novel and innovative technologies, techniques and applications of artificial intelligence, computing and information and communications technologies, and new digital services such as digital marketing, smart tourism, smart agriculture, green and renewable energy sources. Besides, this book focuses on nurturing energy trends including renewable energies, smart grids, human activity impact, communication, behaviour, and social development, and quality of life improvement fields based on the innovative use of sensors, big data and the Internet of things (IoT), telecommunications and machine learning.

The Faculty of Economics and Business Bengkulu University (UNIB) Provinsi Bengkulu, Indonesia, organized the 3rd Beehive International Social Innovation Conference (BISIC) 2020 on 3rd- 4th Oct 2020 in Bengkulu, Indonesia. The number of participants who joined the zoom room was recorded at 450 participants. Participants came from 4 countries, namely Indonesia, Malaysia, Philippines, Thailand. BISIC 2020 is implemented with the support of a stable internet network system and a zoom application. In the implementation there were several technical obstacles encountered by the participants, namely the difficulty of joining the zoom application due to the unstable internet signal.

The holding of a virtual conference felt less meaningful, due to the lack of interaction between speakers and participants. The BICED 2020 committee 30 papers were presented and discussed. The papers were authored by researchers from Thailand, Malaysia, Philippines and Indonesian. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections, and thereafter contributed to the improvement of the quality of the papers.

The 2nd International Conference of Business, Accounting, and Economics (ICBAE) 2020 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by applying multidisciplinary approaches. This conference is the second intentional conference held by Faculty of Economics and Business, Universitas Muhammadiyah Purwokerto and it is a bi-annual agenda of this faculty. In 2020, this event will be held in 5-6 August at Faculty of Economics and Business, Universitas Muhammadiyah Purwokerto. The theme of the 2nd ICBAE UMP 2020 is “ Economics Strength, Entrepreneurship, and Hospitality for Infinite Creativity Towards Sustainable Development Goals (SDGs) ” . It is expected that this event may offer contribution for both academics and practitioners to conduct researches related with Business, Accounting, and Economics Related Studies. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection.

We are delighted to introduce the proceedings of the 1st International Conference on Engineering, Science, and Commerce (ICESC 2019). Tourism is one of the fastest growing industries and contributes

a great deal to economies around the world. However, it is inevitable that activities in the development of the tourism industry have caused many problems both in local culture and the environment. What is the role of Engineering, Science, and Commerce to support Sustainable Tourism? This conference has brought researchers, academicians and practitioners to contribute to the body of knowledge and practical problem solving from the field of engineering, science, and technology that are relevant to support sustainable tourism. Engineering papers focused on the role of renewable energy, information technology, civil and mechanical engineering researches that support sustainable tourism. In the field of science, the papers discussed achievements of the latest technology in finding environmentally friendly products. The role of business and accounting systems to support the sustainable tourism was indicated by more than 20 papers. We hope that the proceedings will be an exceptional source for readers who concern to the impacts of the development of tourism on natural resources, consumption patterns, pollution and social systems.

Anaerobic digestion (AD) is by far the most important technology for providing clean renewable energy to millions in rural areas of many developing countries. AD of biowastes produces both biomethane and anaerobic digestate as a byproduct that can be used further as a biofertilizer. Biowastes including sewage, food processing wastes, animal wastes, and lignocellulosic wastes typically produce biogas containing 55% – 70% biomethane. In the context of energy consumption, more than 85% of the total energy consumed currently comes from non-renewable fossil resources. Biogas technology can provide sustainable, affordable, and eco-friendly energy through waste recycling. This book provides basic knowledge and recent research on biogas production, focusing on the enhancement of biomethane and production routes integrated with microalgae cultivation or agriculture.

The Proceeding book presented the International Conference of Economics, Business & Entrepreneurship (ICEBE), which is an international conference hosted by Faculty of Economics & Business Universitas Lampung (FEB-UNILA) in collaboration with Magister Manajemen Teknologi Universitas Multimedia Nusantara. Total 50 full papers presented were carefully reviewed and selected from 85 submissions with the topics not limited to Finance, Accounting, Marketing and Digital Innovation. The ICEBE 2020 Conference was conducted virtually, on 01 October 2020 which had been attended by academics and researchers from various universities worldwide including practitioners with the theme Innovation and Sustainability in the Digital Age.

This book is the proceeding of the International Conference on Sustainable Management and Innovation (ICoSMI 2020) that was successfully held on 14-16 September 2020 using an online platform. The conference was mainly organized by the Department of Management IPB University in collaboration with Leibniz University of Hannover, Universiti Putera Malaysia, Kasetsart University, Tun Hussein Onn University of Malaysia, Tamil Nadu Teachers Education University, Deakin University, University of Adelaide, Forum Manajemen Indonesia, FE Pakuan University, FE Gajah Mada University FEB University of North Sumatra and FEB Andalas University, SBM Bandung Institute of Technology, FEB Lampung University, Perbanas Institute Jakarta, FE Bina Nusantara University, and SBE Prasetya Mulya University. This conference has brought academic researchers, business practitioners as well as graduate students together to exchange their experiences and research results about most aspects of innovation and sustainability, and discuss the practical challenges encountered and the solutions adopted. About 402 delegates across the world including Indonesia,

Read Book Ejournal S1 Undip Ac Id

Malaysia, Thailand, Spain, China, and India have attended and presented their research works in the conference. The proceeding consists of 80 high-quality papers that were selected from more than 250 submitted papers. The papers are classified into 12 themes, namely Finance for Sustainability, Industry 4.0 and Future Business Sustainability, Policy and Strategy for Sustainable Innovation and Supply Chain, Smart Agriculture Management for Environmental Sustainability, and Sustainable Human Resources. Finally, we would like to express the greatest thanks to all colleagues in the steering and organizing committee for their cooperation in administering and arranging the conference as well as reviewers for their academic works and commitment to reviewing papers.

The theme of the conference is "Reconstructing Morals, Education, and Social Sciences for Achieving Sustainable Development Goals". This theme was formulated due to several considerations. First, the symptoms of moral decline that have the potential to destroy the nation. Morals guide humanity towards truth and civilization. The phenomenon of the dehumanization process in the industrial era that pushed people to be part of abstract societies tends to ignore humanity. The education process as a humanitarian system is increasingly marginalized, especially during discussions about the industrial revolution 4.0 and Society 5.0. The conference placed six sub-themes for speakers and participants to share ideas, namely: Social Sciences and Laws, History and Cultural Studies, Interdisciplinary Studies, Morals and Humanities, Policy, Politics, and Communication, Education. The committee has received 195 abstracts from prospective speakers. However, there are only 80 abstracts that are eligible to be presented at this conference.

Salah satu tantangan utama pemerintah dalam pengelolaan keuangan negara saat ini adalah

penghimpunan pendapatan negara yang berasal dari pajak dan bukan pajak. Rendahnya tax ratio menunjukkan bahwa pemerintah masih harus bekerja keras meningkatkan kemampuan menghimpun penerimaan negara melalui perbaikan sistem administrasi, peningkatan kepatuhan wajib pajak, dan perumusan kebijakan yang tepat. Penyusunan suatu kebijakan yang kredibel haruslah berdasarkan hasil pengkajian, penelitian (research based policy), dan proses public hearing melalui diskusi yang melibatkan para pemangku kepentingan dan akademisi. Selanjutnya, kebijakan disosialisasikan dan dikomunikasikan kepada publik untuk memastikan partisipasi aktif seluruh elemen yang terdampak oleh kebijakan tersebut. Buku ini menggambarkan diskusi yang terjadi dalam proses perumusan sebuah kebijakan. Analisis dari sisi teori, ekonomi makro, praktik-praktik yang berlaku umum, hingga analisis data mikro dilakukan untuk memastikan bahwa pemerintah telah mempertimbangkan berbagai aspek dan dampak yang mungkin terjadi dalam pelaksanaan suatu kebijakan. Hasil pemikiran para peneliti dan pegawai Pusat Kebijakan Pendapatan Negara, Badan Kebijakan Fiskal ini tentu dapat memperkaya diskusi perumusan kebijakan publik di tanah air dan menjadi sumber rujukan bagi para mahasiswa dan akademisi, serta sumber informasi bagi para pelaku usaha dan masyarakat umum.
