One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined.The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.

"A fascinating narrative with all the grace and power embodied in the wild horses that once populated the Western range. . . . [A] magnificently told saga." —Albuquerque Journal A Los Angeles Times Best Nonfiction Book of the Year Mustang is the sweeping story of the wild horse in the culture, history, and popular imagination of the American West. It follows the wild horse across time, from its evolutionary origins on this continent to its return with the conquistadors, its bloody battles on the old frontier, its iconic status in Buffalo Bill shows and early westerns, and its plight today as it makes its last stand on the vanishing range. With the Bureau of Land Management proposing to euthanize thousands of horses and ever-encroaching development threatening the land, the mustang's position has never been more perilous. But as Stillman reveals, the horses are still running wild despite all the obstacles, with spirit unbroken. Hailed by critics nationwide, Mustang is "brisk, smart, thorough, and surprising" (Atlantic Monthly). "Like the best nonfiction writers of our time (Jon Krakauer and Bruce Chatwin come to mind), Stillman's prose is inviting, her voice authoritative and her vision imaginative and impressively broad." —Los Angeles Times "Powerful . . . Stillman's talent as a writer makes this impossible [to stop reading], to the mustang's benefit." —Orion "A circumspect writer passionate about her purpose can produce a significant gift for readers. Stillman's wonderful chronicle of America's mustangs is an excellent example." —The Seattle Times

A PBS Great American Read Top 100 Pick With extraordinary relevance and renewed popularity, George Orwell's 1984 takes on new life in this edition. "Orwell saw, to his credit, that the act of falsifying reality is only secondarily a way of changing perceptions. It is, above all, a way of asserting power."—The New Yorker In 1984, London is a grim city in the totalitarian state of Oceania where Big Brother is always watching you and the Thought Police can practically read your mind. Winston Smith is a man in grave danger for the simple reason that his memory still functions. Drawn into a forbidden love affair, Winston finds the courage to join a secret revolutionary organization called The Brotherhood, dedicated to the destruction of the Party. Together with his beloved Julia, he hazards his life in a deadly match against the powers that be. Lionel Trilling said of Orwell's masterpiece, "1984 is a profound, terrifying, and wholly fascinating book. It is a fantasy of the political future, and like any such fantasy, serves its author as a magnifying device for an examination of the present." Though the year 1984 now exists in the past, Orwell's novel remains an urgent call for the individual willing to speak truth to power.

The Ruffian Mustang Build Book documents a hobbyist car builder's three year journey, taking an ordinary 1970 mustang and turning it into something extraordinary using basic tools, a small two car garage and knowledge gained freely on-line. Follow along with detailed descriptions and hundreds of full color photos, from initial tear down and rust repair to sheet metal fabrication, 3D printing and custom body work. Whether you use the book as reference, inspiration or as a coffee table conversation piece, it's a journey you're unlikely to find anywhere else. 9" x 11" paperback with 138 full color pages.

MG Rover went into administration in April 2005 when its proposed deal with a Chinese company (SAIC) collapsed and it did not have sufficient cash to continue trading. The subsequent closure of MG Rover's plant at Longbridge in the West Midlands resulted in the direct loss of almost 6,000 jobs and with potentially serious consequences for the local economy. This NAO report examines the support provided to MG Rover by the DTI and other public bodies before and during the Company's collapse in 2005, and on the effectiveness of plans to deal with and mitigate the consequences of the firm's closure. Amongst the conclusions drawn, the report identifies weaknesses in the DTI's contingency planning and questions the cost-effectiveness of the DTI's loan of £6.5 million designed to sustain the business for a week while the administrators sought to sell the Company as a going concern. The report goes on to make a number of recommendations to improve future decision-making, contingency planning, and the delivery of training and support in the event of a large-scale company failure.

Recent books and exhibitions have shown that Victorians were not so straitlaced about sexual matters as has been popularly assumed. Ellen Bayuk Rosenman's engrossing and enlightening book proves that the Victorians were extraordinarily articulate and resourceful when it came to expressing their sexual desires. Narratives of erotic experience were written, justified to the conservative culture, and circulated for the pleasure of readers. Rosenman's exploration of masculinity and femininity in Victorian sexual storytelling includes an account of the "spermatorrhea panic" that terrified the men of Britain, tells of Theresa Longworth's erotic revisions of the romance plot, and takes up the exhaustive, even exhausting, pornographic epic My Secret Life. Drawing on social history, court cases, medical literature, popular novels, and the diaries and letters of everyday life, Rosenman looks beyond the usual sexual suspects—homosexuals and prostitutes, for example—to address a range of pleasures that emerged from the ideological structures meant to contain them. She asserts that, however powerful ideology is, it does not script erotic repertoires in definitive or predictable ways, and that individuals can find ways of evading or easing its constraints.

From the author of Man's Search for Meaning, one of the most influential works of psychiatric literature since Freud. Holocaust survivor Viktor E. Frankl is known as the founder of logotherapy, a mode of psychotherapy based on man's motivation to search for meaning in his life. The author discusses his ideas in the context of other prominent psychotherapies and describes the techniques he uses with his patients to combat the "existential vacuum." Originally published in 1969 and compiling Frank's speeches on logotherapy, The Will to Meaning is regarded as a seminal work of meaning-centered therapy. This new and carefully re-edited version is the first since 1988.
