The behind-the-scenes story of the making of the iconic movie *Network*, which transformed the way we think about television and the way television thinks about us "I'm mad as hell, and I'm not going to take this anymore!" Those words, spoken by an unhinged anchorman named Howard Beale, "the mad prophet of the airwaves," took America by storm in 1976, when *Network* became a sensation. With a superb cast (including Faye Dunaway, William Holden, Peter Finch, and Robert Duvall) directed by Sidney Lumet, the film won four Academy Awards and indelibly shaped how we think about corporate and media power. In *Mad As Hell*, Dave Itzkoff of *The New York Times* recounts the surprising and dramatic story of how *Network* made it to the screen. Such a movie rarely gets made any more—one man's vision of the world, independent of studio testing or market research. And that man was Paddy Chayefsky, the tough, driven, Oscar-winning screenwriter whose vision—outlandish for its time—is all too real today. Itzkoff uses interviews with the cast and crew, as well as Chayefsky's notes, letters, and drafts to re-create the action in front of and behind the camera at a time of swirling cultural turmoil. The result is a riveting account that enriches our appreciation of this prophetic and still-startling film. Itzkoff also speaks with today's leading broadcasters and filmmakers to assess *Network*'s lasting impact on television and popular culture. They testify to the enduring genius of Paddy Chayefsky, who foresaw the future and whose life offers an unforgettable lesson about the true cost of self-expression.

We know that our world is undergoing seismic change—but how can we emerge from the crisis a fairer, more equal society? Over the past two centuries or so, capitalism has undergone profound changes—economic cycles that veer from boom to bust—from which it has always emerged transformed and strengthened. Surveying this turbulent history, Paul Mason's *Postcapitalism* argues that we are on the brink of a change so big and so profound that this time capitalism itself, the immensely complex system within which entire societies function, will mutate into something wholly new. At the heart of this change is information technology, a revolution that is driven by capitalism but, with its tendency to push the value of much of what we make toward zero, has the potential to destroy an economy based on markets, wages, and private ownership. Almost unnoticed, in the niches and hollows of the market system, swaths of economic life are beginning to move to a different rhythm. Vast numbers of people are changing how they behave and live, in ways contrary to the current system of state-backed corporate capitalism. And as the terrain changes, new paths open. In this bold and prophetic book, Mason shows how, from the ashes of the crisis, we have the chance to create a more socially just and sustainable economy. Although the dangers ahead are profound, he argues that there is cause for hope. This is the first time in human history in which, equipped with an understanding of what is happening around us, we can predict and shape the future.

A scavenger robot wanders in the wasteland created by a war that has destroyed humanity in this evocative post-apocalyptic "robot western" from the critically acclaimed author, screenwriter, and noted film critic. It's been thirty years since the apocalypse and fifteen years since the murder of the last human being at the hands of robots. Humankind is extinct. Every man, woman, and child has been liquidated by a global uprising devised by the very machines humans designed and built to serve them. Most of the world is controlled by an OWI—One World Intelligence—the shared consciousness of millions of robots, uploaded into one huge mainframe brain. But not all robots are willing to cede their individuality—their personality—for the sake of a greater, stronger, higher power. These intrepid resisters are outcasts; solo machines wandering among various underground outposts who have formed into an unruly civilization of rogue AIs in the wasteland that was once our world. One of these resisters is Brittle, a scavenger robot trying to keep a deteriorating mind and body functional in a world that has lost all meaning. Although unable to experience emotions like a human, Brittle is haunted by the terrible crimes the robot population perpetrated on humanity. As Brittle roams the Sea of Rust, a large swath of territory that was once the Midwest, the loner robot slowly comes to terms with horrifyingly raw and vivid memories—and nearly unbearable guilt. *Sea of Rust* is both a harsh story of survival and an optimistic adventure. A vividly imagined portrayal of ultimate destruction and desperate tenacity, it boldly imagines a future in which no hope

remains, yet where a humanlike AI strives to find purpose among the ruins.

A DELICIOUS HIGH-STAKES ADVENTURE. --PEOPLE MAGAZINE Perfect for fans of Victoria Aveyard and Holly Black, *The Kinder Poison* is an enthralling fantasy adventure that follows a teenage girl chosen to be the human sacrifice in a deadly game between three heirs who will do anything for the crown. With all of the kingdom abuzz, Zahru leaps at the chance to change her fate if just for a night by sneaking into the palace for a taste of the revelry. But the minor indiscretion turns into a deadly mistake when she gets caught up in a feud between the heirs and is forced to become the Crossing's human sacrifice. Now Zahru's only hope for survival hinges on the impossible: somehow figuring out how to overcome the most dangerous people in the world.
