Shortlisted for the 2008 Bruno Zevi Award presented by International Committee of Architectural Critics (CICA). and Winner, Trade Illustrated Category, 2006 AAUP Book Jacket and Journal Show. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In *Archigram: Architecture without Architecture*, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. *Archigram: Architecture without Architecture*—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the "disappearance of architecture."

The title Archigram came from the notion of a more simple and urgent item than a Journal, like a telegram or aerogramme - hence, "archi(tecture)-gram."".

"Power-sector reform and regulation in Africa offers detailed, up-to-date and original research into how governments and policymakers in six African countries have grappled with the development of their energy sectors. Arising out of a two-year peer-learning process involving senior executives in the electricity regulators in each country, the book contains an intelligent and clear analysis of the knowledge and shared experiences gathered in Africa by African scholars."--Publisher's

Now an HBO limited series starring Ben Mendelsohn! Evil has many faces...maybe even yours in this #1 New York Times bestseller from master storyteller Stephen King. An eleven-year-old boy's violated corpse is discovered in a town park. Eyewitnesses and fingerprints point unmistakably to one of Flint City's most popular citizens—Terry Maitland, Little League coach, English teacher, husband, and father of two girls. Detective Ralph Anderson, whose son Maitland once coached, orders a quick and very public arrest. Maitland has an alibi, but Anderson and the district attorney soon have DNA evidence to go with the fingerprints and witnesses. Their case seems ironclad. As the investigation expands and horrifying details begin to emerge, King's story kicks into high gear, generating strong tension and almost unbearable suspense. Terry Maitland seems like a nice guy, but is he wearing another face? When the answer comes, it will shock you as only Stephen King can.

The Better World Shopping Guide, 7th Edition, rates hundreds of products and services from A to F so you can quickly tell the "good guys" from the "bad guys." Drawing on decades of meticulous research, and with a greater emphasis on climate impacts, this updated seventh edition shows who actually "walks the talk".

These case studies complement the earlier groundbreaking work of *Natural Disaster Hotspots: A Global Risk Analysis* published in April 2005. Three case studies address specific hazards: landslides, storm surges and drought. An additional, three case studies address regional multi-hazard situations in Sri Lanka, the Tana River basin in Kenya, and the city of Caracas, Venezuela.
