Thomas Sowell takes aim at a range of legal, social, racial, educational, and economic issues in this latest collection of his controversial, never boring, always thought-provoking essays. From "gun control myths" to "mealy mouth media" to "free lunch medicine," Sowell gets to the heart of the matters we all care about with his characteristically unsparing candor.

"Why?" is the first question we learn to ask as children and the one our parents have the hardest time answering. This is because "Why?" is the most difficult question to research. Why is the color blue used for boys? Why do worms come out onto sidewalks after a rain? Why do chefs wear tall hats? Everyone knows that Donuts have holes . . . We clink glasses before saying a toast . . . Golfers yell "fore!" before teeing off . . . We nod our heads yes and shake our heads no But how many of us know why? You'll learn the answers and a whole lot more in this fun and fact-filled almanac. And all you have to do is ask WHY?!

Collection of columnist Thomas Sowell's controversial columns about issues ranging from homelessness, foreign policy, AIDS, environmentalism, education, law, race and nostalgia.

The bird book for birders and nonbirders alike that will excite and inspire by providing a new and deeper understanding of what common, mostly backyard, birds are doing--and why "Can birds smell?" "Is this the same cardinal that was at my feeder last year?" "Do robins 'hear' worms?" In What It's Like to Be a Bird, David Sibley answers the most frequently asked questions about the birds we see most often. This special, large-format volume is geared as much to nonbirders as it is to the out-and-out obsessed, covering more than two hundred species and including more than 330 new illustrations by the author. While its focus is on familiar backyard birds--blue jays, nuthatches, chickadees--it also examines certain species that can be fairly easily observed, such as the seashore-dwelling Atlantic puffin. David Sibley's exacting artwork and wide-ranging expertise bring observed behaviors vividly to life. (For most species, the primary illustration is reproduced life-sized.) And while the text is aimed at adults--including fascinating new scientific research on the myriad ways birds have adapted to environmental changes--it is nontechnical, making it the perfect occasion for parents and grandparents to share their love of birds with young children, who will delight in the big, full-color illustrations of birds in action. Unlike any other book he has written, What It's Like to Be a Bird is poised to bring a whole new audience to David Sibley's world of birds.
