emotional situations can, contrary to popular belief, be beneficial; for example, our ability to adapt to stress can be improved by experiencing difficult moments on emotional intensity. Zautra masterfully integrates research and theory on emotion and stress, identifying a unique and important role for stressful life events. He offers new insights into how stress and emotions can influence health and illness and demonstrates the wide applicability of this perspective across domains of love and marriage, work, aging, and community. By

level strategy for the prevention of cardiovascular disease, the major cause of death & disability and of rising health care costs in Canada. This report begins with an overview of the CHHI, including the strategies employed.

Chapters two & three present data from a process evaluation of the CHHI, including resource inputs to the provincial heart health programs, a profile of the projects undertaken relative to the key strategies used, the risk factors addressed, the populations targeted, and settings through which interventions were delivered. Chapter four
