This book explores the challenges that disinformation, fake news, and post-truth politics pose to democracy from a multidisciplinary perspective. The authors analyse and interpret how the use of technology and social media as well as the emergence of new political narratives has been progressively changing the information landscape, undermining some of the pillars of democracy. The volume sheds light on some topical questions connected to fake

news, thereby contributing to a fuller understanding of its impact on democracy. In the Introduction, the editors offer some orientating definitions of post-truth politics, building a theoretical framework where various different aspects of fake news can be understood. The book is then divided into three parts: Part I helps to contextualise the phenomena investigated, offering definitions and discussing key concepts as well as aspects linked to the manipulation of information systems, especially considering its reverberation on democracy. Part II considers the phenomena of disinformation, fake news, and post-truth politics in the context of Russia, which emerges as a laboratory where the phases of creation and diffusion of fake news can be broken down and analysed; consequently, Part II also reflects on the ways to counteract disinformation and fake news. Part III moves from case studies in Western and Central Europe to reflect on the methodological difficulty of investigating disinformation, as well as tackling the very delicate question of detection, combat, and prevention of fake news. This book will be of great interest to students and scholars of political science, law, political philosophy, journalism, media studies, and computer science, since it provides a multidisciplinary approach to the analysis of post-truth politics.

A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, —an engaging writer with intellectual range— (The New York Times Book Review), takes us on an epic journey through human cultures, offering a startling new view of the world and ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand's women have the highest number of sexual partners? Why are red and blue states really so divided? Why was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber's van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her

Things I'd love to say to Ryder Covington... I hate you more than a hole in my favorite pair of leggings. Your smirk makes me want to yell in all shouty caps. You're really gorgeous...until you open your mouth. Stop looking at me like that. You're not ripping my panties off. Saying those things to him would be the whipped cream on top of my rocky road ice cream, but I can't, because he's my client. And I'm up for a promotion. Oh, and the little fact that my boss told me to give Mr. Covington everything he wants. But the only thing he wants is me. And he can't have that. During the eighteenth century, Edo (today's Tokyo) became the world's largest city, quickly surpassing London and Paris. Its rapidly expanding population and flourishing economy encouraged the development of a thriving popular culture. Innovative and ambitious young authors and artists soon began to look beyond the established categories of poetry, drama, and prose, banding together to invent completely new literary forms that focused on the fun and charm of Edo. Their writings were sometimes witty, wild, and bawdy, and other times sensitive, wise, and polished. Now some of these high spirited works, celebrating the rapid changes,

extraordinary events, and scandalous news of the day, have been collected in an accessible volume highlighting the city life of Edo. Edo's urban consumers demanded visual presentations and performances in all genres. Novelties such as books with text and art on the same page were highly sought after, as were kabuki plays and the polychrome prints that often shared the same themes, characters, and even jokes. Popular interest in sex and entertainment focused attention on the theatre district and "pleasure quarters," which became the chief backdrops for the literature and arts of the period. Gesaku, or "playful writing," invented in the mid-eighteenth century, satirized the government and samurai behavior while parodying the classics. These entertaining new styles bred genres that appealed to the masses. Among the bestsellers were lengthy serialized heroic epics, revenge dramas, ghost and monster stories, romantic melodramas, and comedies that featured common folk. An Edo Anthology offers distinctive and engaging examples of this broad range of genres and media. It includes both well-known masterpieces and unusual examples from the city's counterculture, some popular with intellectuals, others with wider appeal. Some of the translations presented here are the first available in English and many are based on first editions. In bringing together these important and expertly translated Edo texts in a single volume, this collection will be warmly welcomed by students and interested readers of Japanese literature and popular culture.
