Day-by-day account of a German fighter squadron, one of only two Luftwaffe units to spend the entire war in the West Covers D-Day and the Normandy campaign, Operation Market Garden, the Battle of the Bulge, and more JG 26 was known as "The Abbeville Boys" and seen as an elite squadron Unit flew Messerschmitt Bf 109s and Focke-Wulf Fw 190s

Soviet fighter aviation suffered terribly at the hands of the Jagdwaffe in the first year of the war in the east and, with the arrival of JG 51 and its Fw 190s on the Stalingrad Front in September 1942, things only got worse. However, help was on its way in the form of the La-5. Tougher, faster, and with a greater rate of climb than its predecessors, most were flow by a new generation of better-trained pilots led by combat veterans. These new fighters soon found themselves pitted into action on the Central Sector against the equally new Fw 190As of JG 51. From then on, these two fighters would battle it out in the skies over the Eastern Front. This book tells the complete story of the battles between these two important fighters.

Renowned aviation author and artist, John Weal, presents the last volume of Fw 190 Aces not previously covered in the Aircraft of the Aces series. From mid-1942 until the end of the war, German fighter pilots were deployed in

the defence of the homeland in an effort to halt the near-constant bombing raids by Britain and America. This book tells their story, from the moment when the Luftwaffe began to retreat to the dying days of the Reich. Using previously unpublished photographs, this book charts the story of the men who earned their status as aces while fighting a hopeless battle to protect the land and the people they loved.

I december 1944, precis i slutet av andra världskriget, chockade Hitler en hel värld med en mäktig tysk motoffensiv på västfronten. För andra gången i kriget blev de allierade helt överrumplade av att anfallet kom genom Ardennerna - det kuperade skogsområdet i östra Belgien och Luxemburg. De trodde fortfarande att det inte gick att föra fram en stor armé där, men blev snabbt varse hur fel de haft. Till synes oövervinneliga rullade stora tyska stridsvagnskolonner västerut. Den allra senaste tyska vapentechnologin koncentrerades till denna offensiv - väldiga Köningstiger-stridsvagnar, en revolutionerande ny automatkarbin, flygande bomber och toppmoderna jetflygplan. Tyskarna satte till och med in eldrivna miniubåtar till stöd för Ardenneroffensiven! Halva amerikanska 1. armén kastades över ända och tusentals soldater togs tillfångna. Men i en liten stad, Bastogne, bet sig amerikanska fallskärmsjägarer fast. Under tiden skyndade den hårdföra general Pattons armé till undsättning. Ändå krävdes det ett sex veckor långt, blodigt vinterslag - det mest förlustrika i den amerikanska arméns historia - innan tyskarna hade pressats tillbaka. Christer Bergström har intervjuat krigsveteraner, gått igenom stora mängder arkivmaterial samt rest och forskat i området. Resultatet är en stor mängd tidigare opublicerat material och nya rörelser som presenteras i denna genomgripande skildring av det dramatiska Ardennerlaget vintern 1944/1945. Ardennerlaget beskrivs ofta från den amerikanska utgångspunkten. Här ges både sidors perspektiv lika stort utrymme. Inte minst lyfts veteranernas egna berättelser fram, vilket ger en mänsklig dimension åt detta blodiga slag. Boken är försett med nära 400 illustrationer, inklusive ett stort antal aldrig tidigare publicerade fotografier, ett stort antal kartor av Samuel Svärd och 32 förestklassiga föregångsprofiler av stridsfordon och flygplan av den världskända profilartisten Claes Sundin. Christer Bergström, f. 1958, har ett 20-tal böcker om andra världskriget, flertalet utgivna på den internationella marknaden, bakom sig.

The fourth volume in this momentous series commences with the attacks on the Italian island fortress of Pantellaria which led to its surrender and occupation achieved almost by air attack alone. The account continues with the ultimately successful, but at times very hard fought, invasions of Sicily and southern Italy as burgeoning Allied air power, now with full US involvement, increasingly dominated the skies overhead. The successive occupations of Sardinia and Corsica are also covered in detail. This volume, then, is essentially the story of the tactical air forces up to the point when Rome was occupied, just at the same time as the Normandy landings were occurring in north-west France. In its pages are found what can justifiably be considered the story of 'the soldiers' air force'. Frequently overlooked by more immediate newsworthy events elsewhere, their struggle was often of an equally Homeric nature. With regards to the long-range tactical role of the Allied heavy bombers, only the period from May to October is examined herein, while they remained based in North Africa. Thus the period from November 1943 when the US 15th Air Force was formed to pursue the strategic air offensive against the Reich, together with the RAF's 205 Group of night bombers, will be covered in a future (sixth) volume. Volume Five will deal with the rest of the tactical war in Italy and Greece, over the Adriatic and Aegean, and with the entry into the South of France to join forces advancing southwards from Normandy.

The author argues that the successes and failures of D-Day, on both sides, cannot be explained by comparing the competing strategies of each side. Instead he provides an account of the battle through the overarching nature of the relationship between the leaders and their followers.

The third volume in the epic military aviation series focuses on the Allied invasion of North Africa during World War II. This work of WWII history takes us to November 1942 to explain the background of the first major Anglo-American venture: Operation Torch, the invasion of French North Africa. Describing the fratricidal combat that followed the initial landings in Morocco and Algeria, it then considers the unsuccessful efforts to reach northern Tunisia before the Germans and Italians could get there to forestall the possibility of an attack from the west on the rear of the Afrika Korps forces, then beginning their retreat from El Alamein. The six months of hard fighting that followed, as the Allies built up the strength of their joint air forces and gradually wrested control of the skies from the Axis, are recounted in detail. The continuing story of the Western Desert Air Force is told, as it advanced from the east to join hands with the units in the west. Also covered are the arrivals over the front of American pilots and crew, the P-38 Lightning, the Spitfire IX, and the B-17 Flying Fortress—and of the much-feared Focke-Wulf Fw 190. The aerial activities over Tunisia became one of the focal turning points of World War II, yet are frequently overlooked by historians. Here, the air-sea activities, the reconnaissance flights, and the growing day and night bomber offensives are examined in detail.

The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft – and the struggle for air superiority was never over until the war itself ended. This volume explores four clashes of some of the finest planes and pilots, in key theatres of the war: Spitfires duelling the formidable Bf 109 over the Channel, the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front, the F4F Wildcat in a desperate clash with the legendary A6M Zero-sen, and the F4U Corsair in combat with the second-generation Japanese Ki-84 in the closing days of the war. Fully illustrated with contemporary photographs, maps and colour artwork, Air Combat conveys the full story behind these dramatic aviation duels.

Tracing its roots to Manfred, Freiherr von Richthofen's 'Flying Circus' of WWI, the Jagdgeschwader 'Richthofen' is arguably the most famous fighter unit of all time. Designated JG 1 during the Great War, then disbanded following defeat, the Jagdgeschwader reformed as JG 132. By September 1939 the unit had become JG 2, seeing much action during the Blitzkrieg and Battle of Britain. This first in a new series focusing on elite fighter and bomber units, charts the career of JG 2 from its first aerial kills in 1939 to the destruction of its own Fw 190s in the face of the Allied advance in 1945.
