Accessible to all, this book teaches the essentials to anyone

who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator should master, from the installation and the update of the system, up to the creation of packages and the compilation of the kernel, but also monitoring, backup and migration, without forgetting advanced topics like SELinux/AppArmor setup to secure services, automated installations, or virtualization with Xen, KVM or LXC. Learn more about the book on https: //debian-handbook.info

The Essence of Managing Henry Mintzberg appreciates that managers are busy people. So he has taken his classic book Managing, done some updating, and distilled its essence into a lean 176 pages of text. The essence of the book remains the same: what Mintzberg learned from observing twenty-nine managers in settings ranging from a refugee camp to a symphony orchestra. Simply Managing considers the intense dynamics of this job as well as its inescapable conundrums, for example: ‖ How is anyone supposed to think, let alone think ahead, in this frenetic job? ‖ Are leaders really more important than managers? ‖ Where has all the judgment gone? ‖ Is email destroying management practice? ‖ How can managers connect when their job disconnects them from what they are managing? If you read only one book about managing, this should be it!

A 6x9 120 Page Blank Line Adventure Journal with a giant pink jeep on the cover that says She Who Dies With The Most Toys Wins and it even fits in the glove box! This off road adventure journal for every jeep owner and jeep fan has blank lined pages to fill with the details, stories & memories of your every off road adventure. Also makes a great personal journal or even to take notes with during class. This jeep journal for

all ages makes the best pink jeep lover birthday gift for her, christmas gift and makes a great jeep stocking stuffer! It's the perfect jeep fan gift she'll treasure for a long time to come.

If you want a book that's easy to follow and will show you how to build a gaming computer from start to finish, then this is the one for you. This book is written in an 'easy to understand' manner that will take you through all computer parts individually to help you choose each computer component. There's also help throughout this book on choosing quality computer components and a guide on picking out a version of Windows. Finally, there's a guide on how to build a gaming computer and how to install Windows 10. So let's not hang around any longer... let's get started.

Shocking news greeted Piper when she arrived home for the first time in eight years. The bearer of the news was Wade, the man she'd once loved. Her father, who'd fallen ill and died, owed Wade a huge debt and all the property she was supposed to inherit had to be placed in Wade's name. And she, too, had incurred a significant debt… Unsympathetic, Wade is willing to strike a deal?if Piper gives birth to his baby, he will cancel her debt!

In this gossamer-laced reality there is never a moment to be without your face, to not be together. One false move and you'll get chopped. One night can leave you legendary or a subsidiary. Enter the House of Light, a hyper-glamorous, uber-competitive drag queen refuge where a daughter who was once a son can find a family. While the House are primping and preening for a catwalk showdown, drag queen Nina is wooing the delectable Eric as Wilson. How can Nina/Wilson strut the thorny divide between opposite genders and differing worlds? Wig Out! premiered at the Royal Court Theatre,

London, in November 2008. 'An astonishing young dramatist.'
New York Times

Developers who want to access USB devices from their
embedded systems will find a helpful resource in USB
Embedded Hosts: The Developer's Guide. This new book
from the author of USB Complete shows how small systems
can take advantage of the same wealth of USB devices
available to conventional PCs. The book begins with a review
of USB host communication protocols. Readers then learn
which USB host requirements are relaxed for embedded
systems and what new requirements some embedded
systems must meet. To help in selecting a development
platform, the book explores available hardware and software
for USB host communications in small systems. The heart of
the book focuses on communicating with USB devices. The
topics (with example code) include USB drives, keyboards,
virtual serial ports, network bridges, mics, speakers, video
cameras, and printers, plus devices that don't fit defined USB
classes. Also discussed are systems that support both USB
host and device functions. The example code is written for the
BeagleBoard-xM open development board using a distribution
of Linux targeted to small systems. Also covered is how to
use Linux commands and utilities to learn about, monitor, and
debug communications with USB devices.

A collection of twenty-one traditional tales from the British
Isles.
