Cleaning For Dummies provides readers with green solutions to every common cleaning chore. Focusing on organic, nontoxic, sustainable alternatives to conventional cleaning products, it's packed with suggestions and tips for effective cleaning, and even offers green solutions for sprucing up patios, garages, vehicles, and the exterior of a house.

Create simple solutions for growing organic gardens! The word "hack" has a multitude of meanings these days, but if you ask garden author Shawna Coronado what a hack is, she might just wave her hand toward her own back yard. She could be pointing at the garden bench she created from leftover wood posts and a few cinder blocks, or the rows of wine bottles buried soldier-style along a winding pathway, or even the garden soil itself, which is blended by hand from an organic soil recipe she devised. A hack is really just a great idea that's come to life. In *101 Organic Garden Hacks* you'll find the top tips, tricks, and solutions Shawna has dreamed up in her career as one of America's most creative gardeners. Some are practical timesavers; others offer clever ways to "upcycle" everyday items in your garden. One characteristic every hack shares is that they are completely organic and unfailingly environmentally friendly. Divided into a dozen different categories for easy reference, each hack is accompanied by a clear photo that shows you exactly how to complete it. If you are looking for resourceful ways to improve your garden and promote green living values right at home, you'll love paging through this fascinating, eye-catching book.

Advance your business in the race to go green with industry-specific ideas and innovations Learn how to increase your bottom line and lower your overhead costs by implementing just a few green solutions in your business

- New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some

## File Type PDF Go Green Solutions

are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Let David Bach show you a whole new way to prosper—by going green. Internationally renowned financial expert and bestselling author David Bach has always urged readers to put their financial lives in line with their values. But what if your values are a cleaner and greener earth? Most people think that “going green” is an expensive choice they can't afford. Bach is here to say that you can have both: a life in line with your green values and a million dollars in the bank. *Go Green, Live Rich* outlines fifty ways to make your life, your home, your shopping, and your finances greener—and get rich trying. From driving the right car to making your home energy smart, Bach offers ways to improve the environment while you spend less, save more, earn more, and pay fewer taxes. Best of all, he shows you exactly how to take advantage of the "green wave" in personal finance.

## File Type PDF Go Green Solutions

without the difficult work of evaluating individual stocks. What's more, he will get you thinking about a green business of your own so you can help the world along as it is changing for the better. David Bach is on a mission to teach the world that you can live a great life by living a green life. With Go Green, Live Rich, you can live in line with your eco-values on the road to financial freedom.
