2021 Nissan GT-R Specs & Prices | Nissan USA
The GT-R user's manual states that turning off the VDC is only meant for escaping low-traction situations such as mud or snow. Nissan has re-programmed the 2010 model year GT-R to reduce the engine speed at launch to around 3,000-3,500 rpm with VDC enabled, which is meant to improve acceleration times.

Nissan GT-R - Wikipedia
2018 Nissan GT-R Engine Specs The engine of the 2018 Nissan GT-R is its heart, it’s what sets it apart from the rest. The new Nissan GT-R features an ideally sized, twin-turbocharged 3.8L V6 engine, which breaks the convention point of the standard performance car engine.

New twin-turbo V6 VR38DETT, designed specially for GTR R35, had great potential for tuning. It lets stock GTR display acceleration 0-60 mph quicker than in 3 seconds. No other engines have been ever used for GTR.

Nissan GTR Engines | Specs, upgrades and mods, problems
An E46 GTR came to life in February 2001, powered by the P60B40 a 3,997 cc V8 producing 493 hp (368 kW; 500 PS). Unlike the straight-six powered M3 versions, which were outpaced by the Porsche 996 GT3, the racing version of the E46 M3 GTR 16 was very successful in the American Le Mans Series (ALMS), entered by Schnitzer Motorsport.

R34 GTR Nissan Skyline | Specifications, Images & Information
Mechanically, the GT-R Nismo uses the RB26 engine of the 'standard' GT-R but replaces the standard Garrett T03 turbo chargers with larger T04B models, sacrificing the faster spool up of the ceramic turbo wheels for the enhanced reliability of steel wheels. The GT-R Nismo was only available in colour code KH2 "Gun Grey Metallic". Other minor ...

Cars.

Tak may be in over his head against Shingo in a downhill with his hand fastened to the steering wheel, especially considering that this kind of race favors an FF like Shingo’s Civic against an FR like Tak’s Eight Six. Tak’s life is changing in so many other ways, too. Bunta waxes emotional about his Zen-like training of the increasingly popular Akina downhill specialist, expressing for the first time the importance of Tak’s racing reputation to his own ego, and Natalie advances ever-closer to the edge of a romantic relationship with Tak. And, in a related development, how will the racing scene in Gunma change if Ry actually does get an offer to race professionally in Tokyo?

Emperor on the War Path With the invading Team Emperor and its Evo Army humiliating racers all over Gunma, it’s up to Take and the Phantom Eight Six to defend the racing honor of not only his hometown of Akina, but the entire prefecture. But when Team Emperor’s “Hawk” Iwaki pulls Lancer Evo IV ahead of the Eight Six, not even Tak’s most loyal teammates believe he can win. Maybe he’ll finally learn that lesson his father thinks he needs. Can Tak pull off his biggest miracle yet? Meanwhile, as Tak’s relationship with Natalie heats up, will he discover her shocking secret?

Racing for Life Zack, in his undefeatable GT-R, faces off against Tak in a specially tuned Eight Six. But the hero of the Night Kids racing team may very well learn that agility’s worth more than muscle on Akina Mountain, and that focus is worth more than bombast. Now the racing scene in Gunma Prefecture begins to wonder if Tak can spin that same racing magic on a run other than Mount Akina, while Tak himself shows the nascent signs of a racing obsession—piling on work hours, drawing away from Natalie … perhaps longing for a car of his own, a dream being realized by mousy little Iggy, who’s in the market for a new car and may decide to buy a Levin to match Tak’s Trueno. And Cole’s car comes back from the shop after being totaled on the mountain. It looks like the Akina Speed Stars are shaping up. But racing for fun turns into racing for your life when Shingo arrives on the mountain and challenges Tak to a deathmatch.

Out of the Rain, into the Fire Cocky young Kent Nakamura of the Akagi Red Suns declaimed himself a master of racing in the rain, so when a torrential downpour hits Mt. Myogi, he takes the chance to become the first driver in Gunma to defeat Tak Fujiwara and his Phantom EIght Six. But even if Tak survives the deadly rain battle, another even more fearsome challenge lies in wait for him. Some shadowy characters from team Emperor have been scoping out the Gunma scene looking for some tasty racers to take on in their Lancer Evolution IV. If Tak agrees to a match, the Emperor boys will have to show that they have the skills to back up their trash-talk. The course is set, anticipation hangs in the air … and now Tak may come face to face with the hardest lesson of all … how to lose!

The spirit of the White Comet is as strong as ever, but can even the reinvigorated Ry Takahashi take down the Phantom Eight Six that, to this point, has remained unbeatable? The answer will change the face of Gunma racing forever. And if Tak does end up besting the best of Gunma, he’ll have to face the question posed by his best friend Iggy … “What’s next?” Any way you look at it, things are looking up for the Speed Stars, especially for their leader, Cole, who may yet fulfill his dream of meeting a woman with whom he can share his racing ambitions … even if she is a member of a rival team.

Provides information on engine car models, engine specs, driving techniques, and street and track courses.

The UN-supported Principles for Responsible Investment initiative has led to around a third of the world’s financial assets being managed with a commitment to invest in a way that considers environmental, social or governance (ESG) criteria. The responsible investment trend has increased dramatically since the global financial crisis, yet understanding of this field remains at an early stage. This handbook provides an atlas of current practice in the field of responsible investment. With a large global team of expert contributors, the book explores the impact of responsible investment on key financial actors ranging from mainstream asset managers to religious organizations. Offering students and researchers a comprehensive introduction to current scholarship and international structures in the expanding discipline of responsible investment, this handbook is vital reading across the fields of finance, economics and accounting.
