Although referendums have been used for centuries to settle ethnonational conflicts, there has yet been no systematic study or generalized theory concerning their effectiveness. Referendums and Ethnic Conflict fills the gap with a comparative and empirical analysis of all the referendums held on ethnic and national issues from the French Revolution to the 2012 referendum on statehood for Puerto Rico. Drawing on political theory and descriptive case studies, Matt Qvortrup creates typologies of referendums that are held to endorse secession, redraw disputed borders, legitimize a policy of homogenization, or otherwise manage ethnic or national differences. He considers the circumstances that compel politicians to resort to direct democracy, such as regime change, and the conditions that might exacerbate a violent response. Qvortrup offers a clear-eyed assessment of the problems raised when conflict resolution is sought through referendum as well as the conditions that are likely to lead to peaceful outcomes. This original political framework will provide a vital resource in the ongoing investigation into how democracy and nationalism may be reconciled.

The central theme of Competition and Cost Accounting is that strategic considerations may make it desirable for a firm to have divisions and product managers internalize something other than their true costs. In the case of transfer prices, a high transfer price serves as a means of promoting tacit collusion. In the case of product cost measurement, an inferior cost allocation system that just spreads costs evenly may promote tacit collusion.

Edward Watson of Lyddington, Rutland County, a member of an ancient family, was a justice of the peace and a "surveyor general." He and his wife, Emma Smith, are said to have been the parents of fifteen children; seven are listed in his will. When he died in 1530, he held leases on a half a dozen parsonages and several "lordships, lands, and tenements" and was lord of some fourteen manors. The Watsons of Rockingham Castle were his descendants.

This book re-examines the critical debate regarding Hardy's attitude to women: apologist or misogynist? With the help of manuscript evidence and references to Hardy's autobiography, letters, literary notebooks, marginalia, and the letters of his wives, this book combines a biographical approach with a feminist reading. Significant space is devoted to the 'minor' novels, the short stories, and to Hardy's real life literary

relations with his contemporary women writers, his protégées and his two 'scribbling' wives, to balance the hitherto exclusive focus on the 'major' novels.
