This stirring collection of diaries written by young people, aged twelve to twenty-two years, during the Holocaust is given new life in this enhanced e-book. Featuring a wealth of content including photographs of the writers and their families, images of the original diaries, artwork made by the writers, historical documents, glossary terms, maps, survivor testimony (some available for the first time), and video of the author teaching key passages, this revised and updated version of the seminal National Jewish Book Award winner preserves the impressions, emotions, and eyewitness reportage of young people whose accounts of daily events and often unexpected thoughts, ideas, and feelings serve to deepen and complicate our understanding of life during the Holocaust. This updated edition includes a new preface by Alexandra Zapruder examining the book’s history and impact. Additionally, an in-depth, interdisciplinary curriculum in history, literature, and writing developed by the author and a team of teachers, working in cooperation with the educational organization Facing History and Ourselves, is now available to support use of the book in middle- and high-school classrooms.

Holocaust and Human Behavior uses readings, primary source material, and short documentary films to examine the challenging history of the Holocaust and prompt reflection on our world today

This monumental work of history, The Seventh Million, shows the decisive impact of the Holocaust on the identity, ideology and politics of Israel. With unflinching honesty, Tom Segev examines the most sensitive and heretofore closed chapters of his country’s history, and reveals how this charged legacy has at critical moments (the Exodus affair, the Eichmann trial, the Six-Day War) been molded.

Should French railwaymen during the Second World War be viewed as great resisters or collaborators in genocide? Ludivine Broch revisits histories of resistance, collaboration and deportation in Vichy France through the prism of the French railwaymen – the cheminots. De-sanctifying the idea of railwaymen as heroic saboteurs, Broch reveals the daily life of these workers who accommodated with the Vichy regime, cohabitated with the Germans and stole from their employer. Moreover, by intertwining the history of the working classes with Holocaust history, she highlights unexpected histories under Vichy and sensitive memories of the post-war period. Ultimately, this book bursts the myths of cheminot resistance and collaboration in the Holocaust, and reveals that there is more to their story than this. The cheminots fed both the French nation and the German military apparatus, exemplifying the complexities of personal, professional and political life under occupation.

This book studies the persecution of Italian Jews during the Fascist period in relation to the Italian cultural tradition. It shows that Mussolini's anti-Semitic laws and Italian support for Hitler's war on the Jews stem directly from beliefs deeply embedded in Italian culture. After studying anti-Judaic characterizations in the Christian tradition and representations of Jews by Dante and other Medieval and Renaissance authors, the book shows how the anti-Semitic tradition became reinvigorated in the nineteenth century. cultural figures in the period between 1900 and 1940: the writer Giovanni Papini, the Catholic educational leader Agostino Gemelli, and the artist and critic Ardengo Soffici. The book then examines Mussolini's specific anti-Semitic policies and argues that the Italian cultural system contributed to generating the evil that led to the Holocaust. Wiley Feinstein is Associate Professor of Italian at Loyola University Chicago.

This volume explores post-2000s artistic engagements with Holocaust memory arguing that imagination plays an increasingly important role in keeping the memory of the Holocaust vivid for contemporary and future audiences.

Discusses Hitler's anti-Semitism, collaborationist governments, public opinion in Nazi Europe, death camp victims, the Jewish resistance, and the liberation of concentration camps

One-fourth of the Jews living in France - once considered an asylum for the politically dispossessed - were identified, rounded up, and deported to the death camps of eastern Europe during World War II. In this carefully documented, gripping account of the treatment and fate of French and foreign Jews in Marseille, Donna Ryan explores the extent to which the Vichy government participated in the German plans to exterminate them. Marseille was a major French city in the Vichy Zone that had a large Jewish population; the Italians, who sometimes thwarted French administrators, never occupied Marseille; and it was a regional office of the Commissariat General aux Questions Juives and the Union Generale des Israelites de France, which could provide documentation.

Examines the coverage the American press gave to the Holocaust from 1933 to 1945, and explains how and why it failed to treat the destruction of European Jews as front-page news
