About This Book This guide provides basic information for upgrading HP Compaq Business PCs. WARNING! Text set off in this manner indicates that failure to follow directions could result in bodily

Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

The present economic system requires us to consume and throw away more and more goods. Yet often it's our desire, and the best interests of the environment, for these goods to last. The contributors to this book, who comprise many of the most significant international thinkers in the field, explore how longer lasting products could offer enhanced value while reducing environmental impacts. If we created fewer but better quality products, looked after them carefully and invested more in repair, renovation and upgrading, would this direct our economy onto a more sustainable course? The solution sounds simple, yet it requires a seismic shift in how we think, whether as producers or consumers, and our voracious appetite for novelty. The complex range of issues associated with product life-spans demands a multidisciplinary approach. The book covers historical context, design, engineering, marketing, law, government policy, consumer behaviour and systems of provision. It addresses the whole range of consumer durables - vehicles, kitchen appliances, audio-visual equipment and other domestic products, furniture and floor coverings, hardware, garden tools, clothing, household textiles, recreational goods and DIY goods - as well as the re-use of packaging. Longer Lasting Products provides policy makers, those involved in product design, manufacturing and marketing, and all of us as consumers, with clear and compelling guidance as to how we can move away from a throwaway culture towards an economy sustained by more durable goods.

This innovative, global feminist analysis of work and politics examines the diverse problems and related protests of women and men who labor to make ends meet in a rapidly-changing world. Using vivid examples from around the world, it reveals how "globalization" is reshaping social institutions and lives. Fast Forward explores how businesses and states reshaped and redistributed work around the world during the last 30 years of "globalization," often with adverse consequences. Within this fast-moving context, laboring people today engage in work outside of formal employment, try to obtain survival resources, mount a diverse array of often women-centered protests against firms and states, and try--on their own terms--to reinvent work and democratic political practices. Portraying the human face of global change, Fast Forward shows how overlapping social movements wrestle with economic and political marginalization, and initiate highly diverse, but related attempts to change the way the world works.

The definitive guide to career options for students who want to learn more about their future career prospects. With 500 different careers, from catering and construction to nursing and engineering, Careers 2013 provides detailed facts and statistics about each jobs including the qualifications required and future prospects.

Uprisings such as the Tea Party and Occupy Wall Street signal a resurgence of populist politics in America, pitting the people against the establishment in a struggle over control of democracy. In the wake of its conservative capture during the Nixon and Reagan eras, and given its increasing ubiquity as a mainstream buzzword of politicians and pundits, democratic theorists and activists have been eager to abandon populism to right-wing demagogues and mega-media spin-doctors. Decades of liberal scholarship have reinforced this shift, turning the term "populism" into a pejorative in academic and public discourse. At best, they conclude that populism encourages an "empty" wish to express a unified popular will beyond the mediating institutions of government; at worst, it has been described as an antidemocratic temperament prone to fomenting backlash against elites and marginalized groups. Populism's Power argues that such routine dismissals of populism reinforce liberalism as the end of democracy. Yet, as long as democracy remains true to its meaning, that is, "rule by the people," democratic theorists and activists must be able to give an account of the people as collective actors. Without such an account of the people's power, democracy's future seems fixed by the institutions of today's neoliberal, managerial states, and not by the always changing demographics of those who live within and across their borders. Laura Grattan looks at how populism cultivates the aspirations of ordinary people to exercise power over their everyday lives and their collective fate. In evaluating competing theories of populism she looks at a range of populist moments, from cultural phenomena such as the Chevrolet ad campaign for "Our Country, Our Truck," to the music of Leonard Cohen, and historical and contemporary populist movements, including nineteenth-century Populism, the Tea Party, broad-based community organizing, and Occupy Wall Street. While she ultimately expresses ambivalence about both populism and democracy, she reopens the idea that grassroots movements--like the insurgent farmers and laborers, New Deal agitators, and Civil Rights and New Left actors of US history--can play a key role in democratizing power and politics in America.

"The cycle is a machine, but it is not just a machine. It is the basis of a popular recreational activity as well as a manufacturing industry in Canada. To understand its place in our society we must look at it from all these perspectives"--Abstract., p. v.

This puzzle book contains more than 100 puzzles that are guaranteed to get your brain spinning and your mind whirring. All are set in times past and Merlin the wizard, Avalon, King Arthur and other mythical people and places feature prominently.

Policeman-turned-detective-turned-writer A Yi describes life as a provincial gumshoe in China. Physician Siddhartha Mukherjee visits a government hospital in New Delhi, where he meets Madha Sengupta, at the end of his life and on the frontiers of medicine. Robert Macfarlane explores the limestone underworld beneath the Peak District. And Haruki Murakami revisits his walk to Kobe in the aftermath of the 1995 earthquake. In this issue - which includes poems by Charles Simic and Ellen Bryant Voigt, a story by Miroslav Penkov and non-fiction by David Searcy, Teju Cole and Hector Abad - Granta presents a panoramic view of our shared landscape and investigates our motivations for exploring it. '

This neo-Luddite sequel to Elements of Refusal includes "Future Primitive," "The Mass Psychology of Misery," "Tonality and the Totality," "The Catastrophe of Postmodernism," excerpts from "The Nihilist's Dictionary," and other essays, columns, and reviews. From the editor of Against Civilization and the confidant of alleged Unabomber Ted Kaczynski.

A new edition of the bestselling, seminal biography of Arsenal FC, fully revised and updated with four new chapters to bring it up to date at the end of a potentially historic season for the club. Based on unprecedented access granted to the authors, including exclusive interviews with Arsene Wenger and key board members, current and former players, Arsenal looks in detail at the club's transformation into a global superpower under the stewardship of their French manager right up to the end of the 2010/11 season.
