This book reflects the paradigm shift now manifesting in Bangladesh's education system by highlighting recent empirical research. It shares essential insights by presenting research conducted on diverse aspects of current day education in Bangladesh, including policy and governance, equity, access and participation, curriculum and pedagogy, assessment, and education programs and projects run by NGOs. Further, it offers a platform for these unique studies to be showcased and disseminated to scholars and researchers from developing and developed countries alike, and represents a unique reference resource for the education research community in Bangladesh, Asia and all over the world. With Foreword from Professor Serajul Islam Choudhury.

Ebola is an epidemic virus. This virus is very dangerous than bird flu, SARS, NIPAH (NiV) and other type of epidemic viruses. In recent days the whole people of the universe faces great challenges to remove this Ebola virus from the earth. Researchers and scientists have problems when trying to develop subsidiary diagnostic tools to aid in diagnosis of Ebola Virus Disease in the early stages and undertaking ecological researches on Ebola virus and its probable reservoir. Additionally, the research also aims to observe areas that are suspected to ascertain the disease rates. To effectively prevent Ebola outbreaks in the future, more thorough knowledge of Ebola virus's disease (EVD) natural reservoir and its spread should be gained. The following detail information about Ebola Virus Disease are available in this book: *History of Ebola Virus *Causes of Ebola Virus *Symptoms of Ebola Virus Infection in Human Body *Ebola Virus Disease Diagnosis Process *Treatment and Vaccine for Ebola Virus Disease *Controlling EVD Infection in Health-Care Settings *Advice for EVD Health Professionals *Risk Factors of Ebola Virus Disease *Ebola Vaccine Development Efforts This book is helpful for those people who wants to develop their knowledge about Ebola Virus Disease (EVD) and wants get rid of this virus disease.

Financial Engineering is now a versatile word in the banking domain and more programmers are now very attracted to it as it has lot to offer to them. Due to these new API's the financial tasks and economic operations have now become a very trivial process than it used to be. The background of the book are not just one but many. To make apps from API are usually not very easy and also not so cost effective. Specially, in the financial sector it is really difficult to make apps to make easy transactions and manage finance in very controlled way. Though, there are some APIs but they are not so much cost effective. At this crisis hour of the financial sectors, a concept came to the author to do some research on how can an API can be free, cost effective and at the same time beneficial to make life easier in the financial sectors. So the author thought he could try and do some researches on some open source APIs likes of OpenMAMA and SMART API. Basically, Open MAMA is more preferred on this matter than the SMART API. And also that it is very compatible with any system and also the direct approach OpenMAMA is very attractive for any developer. Also, it really helps the system to be very cost effective is also a very important characteristics of OpenMAMA. On the other hand to work with something which is not tried out yet has also come into the author mind. As a result author has chosen SMART API which is mostly used in health and medical tasks to be in the author research list. And during the research author has found much relevant evidence that SMART API has the potential to be used in the financial sector if fallen into the right hands. These research really motivated author a lot to have a go in this analysis. The analysis also believe if we can really try then the cost of financial sectors and also money transactions process can be really kept under control by the help of these API's. The analysis has given a lot of examples and also give a financial model in these book so it can demonstrate how easy and cost friendly can these open source API's can be. Besides, it was also motivated to think what blessings it can bring to the financial engineering sectors. Also that the author friends and well wiser did help him with all the things needed to be done like helping him with new concepts, providing him with slides and lectures. They also gave the author some videos as well as some valuable suggestions regarding the book. So, that was the main reason behind writing this book. The expectation of the author of this book is given below: "In this book I have discussed about the financial engineering based on APIs system. I have also discussed about financial modeling, Detail information about OpenMAMA and SMART APIs etc. I have tried hard to proof the connections of this two APIs in the financial engineering and financial transaction modeling. Besides I have provided OpenMAMA and SMART APIs features, advantages, disadvantages, their usability and compatibility etc in the financial engineering task. The most important thing of the book is API based financial transaction modeling system development which I have design and discussed in the "3.0 Main body of the analysis" section. I have written this book in project based book writing process. I don't follow traditional technical book writing process. Because I think project based technical book writing process is helpful for article, report & research paper etc writing. And this process makes a book easy to understand to its reader. So by reading my book a reader can easily understand the topics of the book and he/she can easily gather the ideas about how to write academic, non-academic project report, research paper, article etc. I hope my book will be helpful for the future research about this API based financial engineering. So I can say that this book is beneficial for the long run development of API based financial engineering." Show less

This is the second edition of the WHO handbook on the safe, sustainable and affordable management of health-care waste--commonly known as "the Blue Book". The original Blue Book was a comprehensive publication used widely in health-care centers and government agencies to assist in the adoption of national guidance. It also provided support to committed medical directors and managers to make improvements and presented practical information on waste-management techniques for medical staff and waste workers. It has been more than ten years since the first edition of the Blue Book. During the intervening period, the requirements on generators of health-care wastes have evolved and new methods have become available. Consequently, WHO recognized that it was an appropriate time to update the original text. The purpose of the second edition is to expand and update the practical information in the original Blue Book. The new Blue Book is designed to continue to be a source of impartial health-care information and guidance on safe waste-management practices. The editors' intention has been to keep the best of the original publication and supplement it with the latest relevant information. The audience for the Blue Book has expanded. Initially, the publication was intended for those directly involved in the creation and handling of health-care wastes: medical staff, health-care facility directors, ancillary health workers, infection-control officers and waste workers. This is no longer the situation. A wider range of people and organizations now have an active interest in the safe management of health-care wastes: regulators, policy-makers, development organizations, voluntary groups, environmental bodies, environmental health practitioners, advisers, researchers and students. They should also find the new Blue Book of benefit to their activities. Chapters 2 and 3 explain the various types of waste produced from health-care facilities, their typical characteristics and the hazards these wastes pose to patients, staff and the general environment. Chapters 4 and 5 introduce the guiding regulatory principles for developing local or national approaches to tackling health-care waste management and transposing these into practical plans for regions and individual health-care facilities. Specific methods and technologies are described for waste minimization, segregation and treatment of health-care wastes in Chapters 6, 7 and 8. These chapters introduce the basic features of each technology and the operational and environmental characteristics required to be achieved, followed by information on the potential advantages and disadvantages of each system. To reflect concerns about the difficulties of handling health-care wastewaters, Chapter 9 is an expanded chapter with new guidance on the various sources of wastewater and wastewater treatment options for places not connected to central sewerage systems. Further chapters address issues on economics (Chapter 10), occupational safety (Chapter 11), hygiene and infection control (Chapter 12), and staff training and public awareness (Chapter 13). A wider range of information has been incorporated into this edition of the Blue Book, with the addition of two new chapters on health-care waste management in emergencies (Chapter 14) and an overview of the emerging issues of pandemics, drug-resistant pathogens, climate change and technology advances in medical techniques that will have to be accommodated by health-care waste systems in the future (Chapter 15).

This book collects articles on the biology of hematopoietic stem cells during embryonic development, reporting on fly, fish, avian and mammalian models. The text invites a comparative overview of hematopoietic stem cell generation in the different classes, emphasizing conserved trends in development. The book reviews current knowledge on human hematopoietic development and discusses recent breakthroughs of relevance to both researchers and clinicians.

On various subjects pertaining to Bangladesh.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

MAHARASTRA HSC QB Malcolm Forbes said "Education's purpose is to replace an empty mind with an open one" and this is something which is always followed by Maharashtra State Board of Secondary & Higher Education (MSBSHSE). The aim of the Board is not just to let learners obtain basic knowledge but to make them life-long learners. The purpose of this book is to nurture individuality and thus enhance one's innate potentials which help in increasing the self-study mode for students. This book strengthens knowledge and attitude related to subject. This book is designed in such a way that students can set their own goals and can improve their problem solving and thinking skills. This book is strictly as per the latest Maharashtra Board Curriculum for HSC Exams. It contains variety of questions from latest textbooks. It contains all types of questions like VSA Questions (Very Short Answer), SA Questions (Short Answer), MCQs (Multiple Choice Questions) and LA Questions (Long Answer). A synopsis is given for every chapter which contains important points from that chapter. Each chapter has high quality figures wherever required for better, fast and clear understanding. OSWAAL HSC Question Bank is different and better in terms of High Quality Questions which are developed by 'OSWAAL Expert Panel'. The Question Bank is strictly based on the latest MSBSHSE Textbooks and is arranged "TOPIC-WISE" where each Topic from every Chapter is explained in detail. Through OSWAAL Books students are taught how to think, not what to think. We at OSWAAL Books try to use quality content, standard language, creativity and high quality figures, which makes learning easy and fun. This is one of the reasons that the scope of this book extends from students to teachers. Teachers can use this book as a perfect teaching guide and students can use this book for good learning and practice.
