 By using the cat, more, or less commands on files within the /proc/ directory, users can immediately access enormous amounts of information about the system. For example, to display the type of CPU a computer has, type cat /proc/cpuinfo to receive output similar to the following: . processor : 0 vendor_id : AuthenticAMD cpu family : 5 model : 9 model name : AMD-K6(tm) 3D+ Processor stepping ...

Why is high performance indoor wireless service needed, and how is it best implemented? As the challenge of providing better service and higher data speeds and quality for mobile applications intensifies, ensuring adequate in-building and tunnel coverage and capacity is increasingly important. A unique, single-source reference on the theoretical and practical knowledge behind indoor and tunnel radio planning, this book provides a detailed overview of mobile networks systems, coverage and capacity solutions with 2G, 3G and 4G cellular system technologies as a backdrop.

Mobile wireless applications are a good way to increase productivity, improve customer service and streamline business processes. 3G mobile applications, however, bring a unique challenge: ensuring adequate in-building coverage. Indoor Radio Planning provides an overview of mobile networks systems and coverage solutions for cellular networks in buildings. The background of GSM, UMTS and HSPA cellular systems technology are presented and form the backdrop of the main discussion as to why indoor coverage is needed and how it is best implemented. Basic passive distributed antenna systems (DAS) through to advanced fiber optic systems are discussed in detail, giving the reader a good understanding of all the available solutions. In addition, there is a section covering multi-operator systems, as this is becoming a more and more utilized approach. Other sections cover aspects such as how to upgrade passive DAS from 2G to 3G, noise analysis, link budgets, traffic calculations and software tools that can be used to provide help with creating in-building designs. These topics are examined at length from the basic considerations to advanced indoor radio planning. One of the first texts dedicated solely to indoor radio planning, it will be of essential reading to engineering and planning personnel working for mobile operators, with the book being written with radio planners in mind throughout. Indoor Radio Planning will also be of interest to companies who service and manufacture equipment for operators such as suppliers of indoor coverage systems and vendors of base stations for mobile coverage. A unique, single-source reference for both the theoretical and practical knowledge behind indoor radio planning Written by a leading practitioner in the field with more than 15 years of experience Based on real life examples and implemented systems and results Analyzes co-existence of mobile services and inter modulation analysis Outlines the key parameters and metrics for designing DAS for GSM, DCS, UMTS and HSPA

Radio Network Planning and Optimisation for UMTS, Second Edition, is a comprehensive and fully updated introduction to WCDMA radio access technology used in UMTS, featuring new content on key developments. Written by leading experts at Nokia, the first edition quickly established itself as a best-selling and highly respected book on how to dimension, plan and optimise UMTS networks. This valuable text examines current and future radio network management issues and their impact on network performance as well as the relevant capacity and coverage enhancement methods. In addition to coverage of WCDMA radio access technology used in UMTS, and the planning and optimisation of such a system, the service control and management concept in WCDMA and GPRS networks are also introduced. This is an excellent source of information for those considering future cellular networks where Quality of Service (QoS) is of paramount importance. Key features of the Second Edition include: High-Speed Downlink Packet Access (HSDPA) – physical layer, dimensioning and radio resource management Quality of Service (QoS) mechanisms in network for service differentiation Multiple Input – Multiple Output (MIMO) technology Practical network optimisation examples Service optimisation for UMTS and GPRS/EDGE capacity optimisation The 'hot topic' of service control and management in WCDMA and GPRS networks, that has evolved since the first edition Companion website includes: Figures Static radio network simulator implemented in MATLAB® This text will have instant appeal to wireless operators and network and terminal manufacturers. It will also be essential reading for undergraduate and postgraduate students, frequency regulation bodies and all those interested in radio network planning and optimisation, particularly RF network systems engineering professionals.

The bestselling CWNA study guide, updated for the latest exam The CWNA: Certified Wireless Network Administrator Study Guide is the ultimate preparation resource for the CWNA exam. Fully updated to align with the latest version of the exam, this book features expert coverage of all exam objectives to help you internalize essential information. A pre-assessment test reveals what you already know, allowing you to focus your study time on areas in need of review, while hands-on exercises allow you to practice applying CWNA concepts to real-world scenarios. Expert-led discussion breaks complex topics down into easily-digestible chunks to facilitate clearer understanding, and chapter review questions help you gauge your progress along the way. You also get a year of free access to the Sybex online interactive learning environment, which features additional resources and study aids including bonus practice exam questions. The CWNA exam tests your knowledge of regulations and standards, protocols and devices, network implementation, security, and RF site surveying. Thorough preparation gives you your best chance of passing, and this book covers it all with a practical focus that translates to real on-the-job skills. Study 100% of the objectives for Exam CWNA-107 Assess your practical skills with hands-on exercises Test your understanding with challenging chapter tests Access digital flashcards, white papers, bonus practice exams, and more The CWNA certification is a de facto standard for anyone working with wireless technology. It shows employers that you have demonstrated competence in critical areas, and have the knowledge and skills to perform essential duties that keep their wireless technology functioning and safe. The CWNA: Certified Wireless Network Administrator Study Guide gives you everything you need to pass the exam with flying colors.

This ebook includes audio narration. From the creator of The New York Times bestseller Boing! comes the riotous story of a cat gone berserk -- four times over an in alphabetical order each time. Kitty is not happy hen she's told that her favorite foods are all gone and all that's left are Asparagus, Beets, Cauliflower, Dill...and 22 other equally unappealing vegetables. So she: Ate my homework, Bit grandma, Clawed the curtains, Damaged the dishes, and so on, through Z. Only when tastier things arrive (An Assortment of Anchovies, Buffalo Burritos, Chicken Cheesecake...) does she Apologize to Grandma.

The extraordinary, breathless final volume in the Nicholas Everard Naval Thrillers Six midget submarines are about to be towed underwater from Scotland to Norway. Their targets: the giant German warships Tirpitz, Scharnhorst and Lutzow. The odds seem stacked against the smaller craft. But if they can survive the nightmarish 2,000-mile tow, Commander Paul Everard will have a chance to gatecrash the fjords and cripple the ship Churchill calls 'the Beast'. Whether or not he succeeds, the chances of getting out alive are slim. If he fails, his father Nick Everard, escort commander for Arctic convoy PQ19, is in trouble: none of his ships can stand up to Tirpitz's broadsides. As The Gatecrashers draws to its thunderous climax, father and son face their final and most searching test... Based on the thrilling true story of Operation Source, The Gatecrashers is the blistering culmination of the bestselling Nicholas Everard Naval Thrillers. Praise for The Nicholas Everard Naval Thrillers 'The prose has a real sense of urgency, and so has the theme. The tension rarely slackens.' Times Literary Supplement 'The research is unimpeachable and the scent of battle quite overpowering.' The Sunday Times 'The accuracy and flair of Forester at his best... carefully crafted, exciting and full of patiently assembled technical detail that never intrudes on a good narrative line' Irish Times The Nicholas Everard Naval Thrillers The Blooding of the Guns Sixty Minutes for St. George Patrol to the Golden Horn Storm Force to Narvik Last Lift from Crete All the Drowning Seas A Share of Honour The Torch Bearers The Gatecrashers

Gain Critical Insight into the Parallel I/O Ecosystem Parallel I/O is an integral component of modern high performance computing (HPC), especially in storing and processing very large datasets to facilitate scientific discovery. Revealing the state of the art in this field, High Performance Parallel I/O draws on insights from leading practitioners, researchers, software architects, developers, and scientists who shed light on the parallel I/O ecosystem. The first part of the book explains how large-scale HPC facilities scope, configure, and operate systems, with an emphasis on choices of I/O hardware, middleware, and applications. The book then traverses up the I/O software stack. The second part covers the file system layer and the third part discusses middleware (such as MPIIO and PLFS) and user-facing libraries (such as Parallel-NetCDF, HDF5, ADIOS, and GLEAN). Delving into real-world scientific applications that use the parallel I/O infrastructure, the fourth part presents case studies from particle-in-cell, stochastic, finite volume, and direct numerical simulations. The fifth part gives an overview of various profiling and benchmarking tools used by practitioners. The final part of the book addresses the implications of current trends in HPC on parallel I/O in the exascale world.

EuCAP has provided the ideal place for the exchange of scientific and technical information, and to foster collaboration and cooperation in the Antenna and Propagation domain, at both European and global levels With this aim, EuCAP has been a regular keystone event on Antennas and Propagation, with a large participation of the world community In addition to enabling the exchange of information and the access to the latest developments in the field through guest speakers and paper presentations, the conference features exhibitors demonstrating software, equipment, and technology A wide variety of applications, ranging from mobile and satellite communications to medicine are addressed

Contains all the listening material to accompany each level including chants, vocabulary songs, stories and nursery rhymes.
