When Ellen finished the Vendee Globe, yachting's toughest race aged just 24 the nation took her to it's heart. The depth of the affection for Ellen is extraordinary - she makes people feel like they can do anything! This is her story, written in true Ellen style, in her own words, without the help of a ghost writer. Passionate, dramatic and and deeply affecting, her story will move and inspire all who read it.

Exam Board: Edexcel Level: GCSE Subject: Business First Teaching: September 2017 First Exam: June 2019 Endorsed for Edexcel Let Ian Marcouse successfully steer you through the new specification with his proven and popular approach to Business; clear content coverage is enhanced by numerous real-life examples to create a course that engages, motivates and develops every student. - Breaks down the content of the 2017 specification into clear, accessible explanations of important concepts and theories - Helps students apply their knowledge to a range of real business examples, issues and contexts, supported by 'Talking Points' that encourage critical and commercial thinking - Improves quantitative, investigative, analytical and evaluation skills through end-of-chapter exercises - Builds students' confidence approaching their exams as they practise calculation, short answer and extended-writing questions with stimulus materials - Boosts students' vocabulary and supports revision with definitions of key terminology for each topic

Cambridge O Level Principles of Accounts has been designed specifically to meet the requirements of the Cambridge syllabus. Cambridge O Level Principles of Accounts has been written specifically for the Cambridge O Level Accounting syllabus. Accounting principles and practices have been explained in simple language to enhance the accessibility of the contents to students whose first language is not English. The book reflects the changes in the O Level Principles of Accounts syllabus and applies international accounting terminology.

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

This book is a first-person account of a disaster on a solo hiking trip. Author Amy Racina was hiking in a remote part of King's Canyon National Park in California's Sierra mountains when she lost the trail. With no warning, she suddenly fell sixty feet, breaking both legs on the rocks below. She survived for four days and nights, battling pain, fear and exhaustion, pulling herself along with her hands and refusing to give up. She was miraculously saved, her calls heard by a man who was partially deaf. It describes her dramatic rescue as she was airlifted out, swinging helplessly from two straps, dangling fearfully beneath a helicopter high above the ravine where she had fallen. It is an amazing tale of despair and courage and

hope. It speaks of incredible strength and heartbreaking weakness as it details what one woman believed might be the last days of her life. It is a memory of the darkest of times and an affirmation of miracles.

Poe's preference for not naming his narrators is potent once again in "The Tell-Tale Heart", a story that is trying so hard to appear sane, but fails miserably in the end. With minute preparations, perfect calculations, and even more precise execution of the conceived gruesome act, the narrator successfully fulfils his purpose, only to be lost in a battle with his sanity and guilt afterwards. Backed by the numerous movie and theatrical adaptations, the story is considered one of Poe's most popular and critically acclaimed. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1945), "The Black Cat" (1943), and "The Gold-Bug" (1843).

Explains how animals use chemical communication, emphasising the evolutionary context and covering fields from ecology to neuroscience and chemistry.
