'In this remarkable book, David Rowan tells a story of transformation: how an organisation has found a new way of doing things through innovation driven by ruthless entrepreneurial imagination. What is especially useful is that he does not just stick with small startups, let alone dreamy "inventors". He finds innovation in big companies and even within governments.' - Matt Ridley, The Times _____ David Rowan travels the globe in search of the most exciting and pioneering startups building the future. He's got to know the founders of WhatsApp, LinkedIn, Google, Spotify, Xiaomi, Didi, Nest, Twitter and countless other ambitious entrepreneurs disrupting businesses in almost every sector. And yet too often the companies they're disrupting don't get it. They think they can innovate through jargon; with talk of change agents and co-creation gurus, ideas portals and webinars, make-a-thons and hackfests, paradigm shifts and pilgrimages to Silicon Valley. It's mostly pointless innovation theatre — corporate nonsense that has little to do with delivering real change. But during this quest he's also discovered some genuinely exciting and transformative approaches to innovation, often in places you might least expect. Get ready for: · The airline that rewards passengers for walking their dog · The bank that performs surgery · The country that's an app store And many more. Packed full of tips for anyone looking for radical ways to adapt and thrive in the digital age, this carefully curated selection of stories will reveal ideas for creating genuine innovation from some of the world's most inspiring leaders. _____

The foreign exchange market is huge, fascinating and yet widely misunderstood by participants and non-participants alike. This is because its unanswered questions are numerous. For instance, what is the purpose of the \$4 trillion per day trading volume? What determines currency trends and who are the players in the FX arena? Does FX drive other financial markets, or is it the passive end-product of all the other markets? FX is without clear supply and demand factors, so how do traders determine sentiment and price direction? Much is written in an effort to answer these questions, but a lot of it is just noise. In the 12 pieces here, Barbara Rockefeller and Vicki Schmelzer draw on their combined 50 years' experience in foreign exchange to cut through the clutter and provide an elegant and razor-sharp look at this market. Their analysis is accurate, useful and enlivened by many anecdotes and examples from historic market events. They cover: · How the matrix concept can help observers understand foreign exchange market action · What professional FX traders take into consideration before entering into positions · Whether the FX market can be forecast · The interplay between foreign exchange and other financial markets · How technology has levelled the playing field between big and small players, and at what cost · Whether the prospect of reserve currency diversification away from the dollar is likely · The toolkit that central banks use to manage national economies and the effect of this on currencies 'The Foreign Exchange Matrix' is the go-to book for anyone seeking a deeper understanding of the world of foreign exchange.

Many nations are currently adopting a variety of directed strategies to launch and support research parks, often with significant financial commitments and policy support. By better understanding how research parks of other nations operate, we can seek to improve the scale and contributions of parks in the U.S. To that end, the National Academies convened an international conference on global best practices in research parks. This volume, a report of the conference, includes discussion of the diverse roles that research parks in both universities and laboratories play in national innovation systems. The presentations identify common challenges and demonstrate substantial differences in research park programs around the world.

In healthcare, even the way we change has changed. Quint Studer's new book helps you hardwire the skills you need to perform at a higher level continuously.

The Ebola epidemic in western Africa has demonstrated that public health, and public health ethics, is global and not merely local. Recognizing that public health preparedness requires ethics preparedness, the Bioethics Commission sought to create recommendations that support policies and practices that enable a proactive response to public health epidemics. In Ethics and Ebola the Bioethics Commission offers seven pointed recommendations related to engagement, infrastructure, communications, and integration; specifically, the Commission considers what lessons the U.S. response to the epidemic in western Africa has for ethics preparedness for future public health emergencies, and examines ethical dimensions of restrictive public health measures, the use of placebos for treatment and vaccine trials, and collecting and sharing biospecimens for future research. Ethics and Ebola is a Commission-directed project.

Professor Dominic Welsh has made significant contributions to the fields of combinatorics and discrete probability, including matroids, complexity, and percolation. This volume summarises and reviews the consistent themes from his work through a series of articles written by renowned experts.

Publisher Description

One in ten people risks falling into depression. Two in ten are struggling to find what makes them happy. Five in ten are questioning the purpose of life. Nine in ten will not have answers to the questions above. Have you dealt with such situations? Are you still trying to answer the most basic questions of life? Are these questions beginning to seem like the toughest question paper you've ever had to answer? What makes you happy? What will keep you fulfilled? Is there any purpose to being who you are? On a not-so-fateful night, thirty-five-year-old Arjun embarks on a journey that will force him to rehash, revisit, reimagine and refuel his life. In the next ten days of his life, he meets six strangers who teach him exactly the lessons he needs. He takes the hard route to self-awareness, forgiveness, finding himself and reclaiming his life from the jaws of his past. With Lost and Found at 35, immerse yourself in the life-changing story of Arjun and uncomplicate the mystery of living with passion and purpose.
