Engineering Interactive Systems 2007 is an IFIP working conference that brings together researchers and practitioners interested in strengthening the scientific foundations of user interface design, examining the relationship between software engineering (SE) and human-computer interaction (HCI) and on how user-centered design (UCD) could be strengthened as an essential part of the software engineering process. Engineering Interactive Systems 2007 was created by merging three conferences: HCSE 2007 Human-Centered Software Engineering held for the first time. The HCSE Working Conference is a multidisciplinary conference entirely dedicated to advancing the basic science and theory of human-centered software systems engineering. It is organized by IFIP WG 13.2 on Methodologies for User-Centered Systems Design. EHCI 2007 Engineering Human Computer Interaction was held for the tenth time. EHCI aims to investigate the nature, concepts,

and construction of user interfaces for software systems. It is organized by IFIP WG 13.4/2.7 on User Interface Engineering. □ DSV-IS 2007 □ Design, Specification and Verification of Interactive Systems was held for the 13th time. DSV-IS provides a forum where researchers working on model-based techniques and tools for the design and development of interactive systems can come together with practitioners and with those working on HCI models and theories.

Accompanies a CD-ROM containing over 90 tools and applications of differential equations drawn from engineering, physics, chemistry, and biology. Covers first- and second-order differential equations, linear and nonlinear systems, Laplace transforms, and series solutions.

This groundbreaking book showcases timeless stitches and forms from the ancient art of sewn beadwork, and presents them in springing leaps of shape and structure that will remind you of flowers, cathedrals, spaceships, and contemporary architecture.

Offering fresh alternatives to common instructional practices that fail to get results, this accessible, highly practical guide highlights ways to motivate middle school students while enhancing content-area learning. Each chapter features an enlightening case study of a teacher whose current strategies are not supported by research; describes effective instructional alternatives, illustrated with concrete examples; and lists online resources and lesson examples. Emphasis is given to supporting critical engagement with texts and drawing on technology and new literacies. The book covers specific content areas including science, social studies, math, and
