c. Optimal solution is  $x_1 = 0, x_2 = 4, y = 5$  In 4. Any positive value for  $x_1$  reduces  $y$ . d. If  $k = 20$ , optimal solution is  $x_1 = 15, x_2 = 5$ . Because  $x_2$  provides a diminishing marginal increment to  $y$  whereas  $x_1$  does not, all optimal solutions require that, once  $x_2$  reaches 5, any extra amounts be devoted entirely to  $x_1$ .

Examine microeconomic theory as a way of looking at the world as MICROECONOMICS: AN INTUITIVE APPROACH WITH CALCULUS, 2E builds on the basic economic foundation of individual behavior. Each chapter contains two sections. The A sections introduce concepts using intuition, conversational writing, everyday examples, and graphs with a focus on mathematical counterparts. The B sections then cover the same concepts with precise, accessible mathematical analyses that assume one semester of single-variable calculus. The book offers flexible topical coverage with four distinct paths: a non-game theory path through microeconomics, a path emphasizing game theory, a path emphasizing policy issues, or a path focused on business. Readers can use B sections to explore topics in greater depth.
