International Finance is an established and internationally renowned introduction to the subject for undergraduate and postgraduate students. It draws on recent events to provide comprehensive coverage of traditional theories and new research relating to the balance of payments, exchange rate determination and the international monetary system.

Finance and Financial Markets is a major text designed for introductory undergraduate, postgraduate and MBA courses in finance. It provides a comprehensive yet relatively non-technical introduction to modern day financial institutions, markets and instruments.

This popular textbook offers a broad and accessible introduction to the building blocks of modern finance: financial markets, institutions and instruments. Focussing on the core elements of the subject, the author blends theory with real-life data, cases and numerical worked examples, linking the material to practice at just the right level of technical complexity. This new edition has updated data and cases throughout, ensuring that it is as up-to-date as possible in this fast-moving area. More assessment and self-test resources have been added to the book to help support students and lecturers. It is ideally suited to students at all levels who take economics, business and finance courses, as well as for those who want to understand the workings of the modern financial world.

This book is the CORE TEXT for Quantitative Methods for Business Management Course Convenors: Lee Fawcett and Daniel Henderson

The Indian Financial System has almost been completely transformed to keep up with the changing economic scenario, necessitating a through revision of this textbook. The fourth edition of Indian Financial System takes into account these changes in all their complexities yet retaining the original focus on the analysis of the principles and practices in the money market, capital market and the foreign exchange market.

The UK financial system, now in its fifth edition, provides an up-to-date discussion of the UK financial system and the changes affecting it. Throughout the world the nature and regulation of financial systems have changed dramatically following the global financial crisis. In this text the necessary underlying theory is introduced and a range of relevant statistics provided in each chapter to supplement the narrative. Coverage includes a critique of the UK financial institutions and markets, as well as regulation emanating both from within the UK and also from supranational bodies such as the Bank for International Settlements and the European Union. The discussion is based on both the underlying theory as well as the operating practices of the institutions and markets. Each supplemented by a comprehensive glossary, the book is subdivided into three main sections: financial institutions; financial markets; and the regulation of banks and other financial institutions. The book will be essential reading to lecturers and undergraduate students enrolled on courses in financial economics and banking.

Provides a unique comparative survey of financial systems in Europe and the US, unified under a rigorous theoretical framework.

In five brief episodes two hippopotamuses reinforce their friendship.
