The standard mode of transportation for decades in Europe, motor scooter was a cult "fun" vehicle in the USA until the past two years. With oil prices soaring and the 20-to-40 set looking for alternative means of commuter (and weekend cruising) travel, motor scooter have exploded across the United States. In 2001, less than 30,000 scooters cruised U.S. roadways. In 2005, over 100,000 are road-bound, and the number is growing by double digits each year. Beginning at \$1,000 and ranging up over \$5,000, dozens of models of scooters are available, as are thousands of accessories. And scooter clubs meet from San Diego to Bangor, Maine. Every year, the largest gathering of motor scooters takes place in Indianapolis, speed capital of the world. The Complete Idiot's Guide to Motor Scooters is the perfect introduction to the wonderful world of motor scooting.

This book charts the effects of new communication technologies and the Internet on the creation of music in the early 21st century. It examines how the music industry will be altered by the Internet, music online services and MP3-technology. This is done through an integrated model based on an international history of the industry since the phonograph's invention in 1877, and thus, the history of the music industry is described in full detail for the first time.

A collection of essays on a wide range of aspects of the Roma communities, cultures, social and political conditions across Europe. The scholarly field of Romany studies is trapped by the history of Roma in a unique and peculiar position in Europe. The investigation of Roma was in the past marginal to academic concerns because most of its practitioners were amateur folklorists interested in treating the Roma as paragons of a lost world and not as citizens of modern nation-states. Today the field is hemmed in by two different power fields: the emotionally understandable, though intellectually debilitating, concern to turn the plight of the Roma into a matter of human rights and the difficulty that academics experience in dealing with people who are not a people in the sense that nation states constitute and make peoples.

Black Morocco: A History of Slavery, Race, and Islam chronicles the experiences, identity and achievements of enslaved black people in Morocco from the sixteenth century to the beginning of the twentieth century. Chouki El Hamel argues that we cannot rely solely on Islamic ideology as the key to explain social relations and particularly the history of black slavery in the Muslim world, for this viewpoint yields an inaccurate historical record of the people, institutions and social practices of

slavery in Northwest Africa. El Hamel focuses on black Moroccans' collective experience beginning with their enslavement to serve as the loyal army of the Sultan Isma'il. By the time the Sultan died in 1727, they had become a political force, making and unmaking rulers well into the nineteenth century. The emphasis on the political history of the black army is augmented by a close examination of the continuity of black Moroccan identity through the musical and cultural practices of the Gnawa.

Literary Helsinki: a city of leisure and light, divided along the fault lines of gender, class and language; a dizzying and dazzling threshold of modernity; alienating, mesmerizing and endearing. This first monograph to examine experiences of Helsinki in literature written in Finnish shows that rich descriptions of urban life have formed an integral part of Finnish literature from the late nineteenth century onward. Based on an analysis of more than sixty novels and collections of short stories, it tells the naturally evolving story of how Helsinki was experienced in literature.
