The Ceed Sportswagon isn't as cheap to buy as you might expect compared to some rivals, although it is well equipped. We compared the 1.6-litre diesel 3 model, with a manual gearbox, to equivalent versions of the Volkswagen Golf estate, Ford Focus estate and Vauxhall Astra Sports Tourer estate, and found that differences in running costs over three years or 60,000 miles aren't dramatic.

Kia says that the Sportswagon 's new unabbreviated name captures the car 's sporting and modern character, further differentiating it from the older generation. One thing 's for sure: with well-established medium estate rivals like the Ford Focus and the Vauxhall Astra Sports Tourer, the Kia has a fight on its hands.

The book about the Westerweel Group tells the fascinating story about the cooperation of some ten non-conformist Dutch socialists and a group of Palestine Pioneers who mostly had arrived in the Netherlands from Germany and Austria the late thirties. With the help of Joop Westerweel, the headmaster of a Rotterdam Montessori School, they found hiding places in the Netherlands. Later on, an escape route to France via Belgium was worked out. Posing as Atlantic Wall workers, the pioneers found their way to the south of France. With the help of the Arm é e Juive, a French Jewish resistance organization, some 70 pioneers reached Spain at the beginning of 1944. From here they went to Palestine. Finding and maintaining the escape route cost the members of the Westerweel Group dear. With some exceptions, all members of the group were arrested by the Germans. Joop Westerweel was executed in August 1944. Other members, both in the Netherlands and France, were send to German concentration camps, where some perished.

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world 's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Vehicle Design guides readers through the methods and processes designers use to create and develop some of the most stunning vehicles on the road. Written by Jordan Meadows, a designer who worked on the 2015 Ford Mustang, the book contains interviews with design directors at firms including Fiat Chrysler Automobiles, Hyundai Motor Group, and Ford Motor Company, amongst other professionals. Case studies from Ford, Mazda, and Jeep illustrate the production process from research to execution with more than 245 color behind-the-scenes images in order to help readers create vehicles drivers will cherish.

This edition of Swokowski's text is truly as its name implies: a classic. Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. It's popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.

The iF Design Awards 2014 annual presents all winners of the iF Product Design Awards 2014 and the iF Communications & Packaging Design Awards 2014--including some 2,000 entries. New this year is that all iF awards from this year are published in one comprehensive volume and sorted according to the manufacturer. This provides the reader with an even more convenient overall survey. As always, this reference work provides an international cross-section over various fields of design and serves as an archive of the manufacturers and designers who have been honored. This new portrayal of the winning entries is combined with the iF Design Award--App 2014, which is released simultaneously.

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.
