An invaluable handbook for observing and photographing the forthcoming solar and lunar eclipses due in the 1990s.

"...There will be signs in the sun, in the moon, and in the stars...Now when these things begin to happen, look up and lift up your heads, because your redemption draws near." Luke 21:25a, 28 It is rare that Scripture, science, and history align with each other, yet the last three series of Four Blood Moons have done exactly that. Are these the "signs" that God refers to in His Word? If they are, what do they mean? What is their prophetic significance?

In this simple guide, David Levy inspires readers to experience the wonder of eclipses and other transient astronomical events for themselves. Covering both solar and lunar eclipses, he gives step-by-step instructions on how to observe and photograph eclipses. As well as explaining the science behind eclipses, the book also gives their historical background, discussing how they were observed in the past and what we have learned from them. This personal account contains examples from the 77 eclipses the author has witnessed himself. The guide also includes chapters on occultations of stars and planets by the Moon and of asteroids by stars, and the transits of Mercury and Venus. Tables of future eclipses make this invaluable for anyone, from beginners to practised observers, wanting to learn more about these fascinating events.
