ACERCA DE ESTE MANUAL Gracias por elegir el eTrex Vista de Garmin. Para sacarle el mayor rendimiento tómese el tiempo necesario para leer el manual y entender todas sus funciones. Este manual está organizado en cuatro secciones: La sección de Introducción proporciona información a cerca de la seguridad del equipo y la FCC.

This book shows you how to use a GPS and Google Earth to create simple and expressive maps to share on the web like the one shown on the cover. With a reading time of a mere 10 hours you will learn to work with a GPS without making mistakes, to use it with Google Earth including in areas without internet access and to quickly create diverse interactive maps that other people can see and modify over the internet without the need for experts or unnecessary complications. Even though it has been written in the context of Relief and Development work, the same process is valid for whatever other application.

INNOVATE was a comprehensive, collaborative, and binational research project. It ran from January 2012 through December 2016. Brazil and Brazil's Northeast in particular suffered from a severe drought period from 2012 onwards. Management and governance of natural resources faced serious challenges related to access to water. Important long-term drivers that call for recurrent adaptation of actions are land use change, population growth, climate change, and conflicts from the multiple uses of water. The scientific project addressed this complex situation through research aimed at suggesting practices and pathways towards ecologically and socioeconomically sound management of land, water and biodiversity. The INNOVATE project had one focus on the entire watershed of the São Francisco River and another one on a portion of the watershed – the Itaparica Reservoir and the semi-arid area north of the artificial lake. Researchers with different backgrounds worked within their disciplines, in groups (interdisciplinary) and together with stakeholders (transdisciplinary). The Guidance Manual is a compilation of actor-relevant content extracted from the scientific research results. Most recommendations put forward can be adapted as principles and standards for reservoir and semi-arid regions elsewhere in the world. INNOVATE war ein umfassendes, bi-nationales Verbundforschungsprojekt zwischen Brasilien und Deutschland, mit einer Kernlaufzeit von Januar 2012 bis Dezember 2016. Im Jahr 2012 begann eine besonders schwere Dürreperiode, welche nicht nur den sowieso trockenen Nordosten Brasiliens traf, sondern auch weitere Teile des Landes. Die stark eingeschränkte Wasserverfügbarkeit wurde zum zentralen Thema von Management und Governance der natürlichen Ressourcen. Wichtige langfristige Treiber, welche eine kontinuierliche Anpassung des Handelns notwendig machen, sind Landnutzungsänderungen, Bevölkerungswachstum, Klimawandel und Konflikte um die verschiedenen Wassernutzungsansprüche. Im Projekt wurden Praktiken und Ansätze zur ökologisch und sozialökonomisch verträglichen Bewirtschaftung von Wasser, Land und Biodiversität entwickelt. Das Studiengebiet des INNOVATE-Projekts umfasste dabei das gesamte Wassereinzugsgebiet des São Francisco Flusses, wobei Feldforschung im semi-ariden Umland nördlich des Itaparica Stausees stattfand. Forscher und Forscherinnen aus verschiedenen Disziplinen arbeiteten disziplinar, in Gruppen (interdisziplinär) sowie gemeinsam mit Stakeholdern (transdisziplinär). Das vorliegende Handbuch ist eine

Zusammenstellung von Stakeholder-relevanten Empfehlungen, welche aus den Ergebnissen der wissenschaftlichen Forschung abgeleitet wurden. Die meisten hier vorgestellten Handlungsempfehlungen können weltweit an vergleichbare Stausee- und semi-aride Regionen angepasst werden.

O INNOVATE foi um projeto de pesquisa interdisciplinar, participativo e binacional, envolvendo instituições acadêmicas do Brasil e Alemanha. Teve início em janeiro de 2012 e fim em dezembro de 2016. O Brasil, e em particular o Nordeste do Brasil sofreu com um severo período de seca que teve início em 2012. A gestão e a governança dos recursos naturais enfrentam sérios desafios relacionados ao acesso à água. A mudança do uso da terra, o crescimento populacional, as mudanças climáticas e os conflitos com os múltiplos usos da água são importantes questões que exigem recorrentes adaptações a curto, médio e longo prazo. O projeto científico abordou esta complexa situação por meio de pesquisas destinadas a propor práticas e alternativas para a gestão sustentável dos recursos naturais levando em consideração as dimensões ecológicas, socioeconômicas e político-institucionais. O projeto INNOVATE teve um dos focos em toda a bacia hidrográfica do rio São Francisco e outro com destaque para uma porção semiárida da bacia hidrográfica - o reservatório de Itaparica e a região de seu entorno. Pesquisadores com diferentes experiências trabalharam dentro de suas áreas de conhecimento, em grupos (interdisciplinar) e em conjunto com as partes interessadas (transdisciplinar). Este Manual de Diretrizes é uma compilação de relevantes conteúdos para atores extraídos de resultados das pesquisas científicas. A maioria das recomendações apresentadas pode ser adaptada como princípios e padrões para reservatórios e regiões semiáridas do Nordeste do Brasil e outras partes do mundo. INNOVATE was a comprehensive, collaborative, and binational research project. It ran from January 2012 through December 2016. Brazil and Brazil's Northeast in particular suffered from a severe drought period from 2012 onwards. This manual is a complete user manual for Garmin handheld receivers. It covers theory and practical applications for gps technology and the receivers that use this technology. Representative products for all of the Garmin handheld receivers, past and present, are explained and tips are given on getting the most out of each model. It is designed to augment the user manuals that are supplied with each product but is complete enough to replace them. While this manual is Garmin specific it provides a basic understanding of gps devices that is applicable to any gps receiver. It was written over a period of 4 years and has been reviewed and tested by hundreds of users over that period. It has been used as the reference for training on gps usage. Because of its unique approach that develops the theory behind operation as well as specific details, it provides a basis that will allow a user to be able to use any gps receiver. Skills in the use of a gps will provide assurance and safety for the user. Topics extend beyond just operating the unit to actually being able to use it for navigation on the land, in the sea, or in the air. Topics are applicable whether you are hiking or driving to your destination. These topics include product operation, waypoints, routes, tracklogs, navigation, maps and databases, product selection, features, theory, accessories, and product unique functions.

Este libro te muestra como usar un GPS y Google Earth para crear mapas sencillos y expresivos como el que se muestra en la portada para compartir en la red. Con una lectura de apenas 10 horas, aprenderas a trabajar con un GPS sin errores, a usarlo junto con Google Earth incluso en zonas sin acceso a internet y a crear rapidamente diversos mapas interactivos que otras personas pueden ver y modificar a traves de internet sin necesidad de expertos ni complicaciones innecesarias. Aunque se plantea en el contexto de la Cooperacion al Desarrollo, el mismo procedimiento es valido para cualquier otra aplicacion."
