One of the student workbook series "Math in Focus"'s for students. This workbook provides great word problems, riddles, challenging practice questions, and plenty of practice exercises to help my kid practices to understand what he is learning. His foundation is pretty solid after the training of this series.

Singapore Math creates a deep understanding of each key math concept, includes an introduction explaining the Singapore Math method, is a direct complement to the current textbooks used in Singapore, and includes step-by-step solutions in the answer key. Singapore Math, for students in grades 2 to 5, provides math practice while developing analytical and problem-solving skills. This series is correlated to Singapore Math textbooks and creates a deep understanding of each key math concept. Learning objectives are provided to identify what students should know after completing each unit, and assessments are included to ensure that learners obtain a thorough understanding of mathematical concepts. Perfect as a supplement to classroom work, these workbooks will boost confidence in problem-solving and critical-thinking skills!

This consumable student workbook is part of the Math in Focus: The Singapore Approach curriculum series. Book 3B, this workbook accompanies Math in Focus' Student Book Grade 3, Part B, and provides opportunities for practice, assessment, and skill-development. Cheery illustrations and easy-to-understand text give kids a fun atmosphere to work in. This book's exercises focus on money; metric length/mass/volume, bar graphs, fractions, time & temperature, angles & lines, area & perimeter, and more. Each chapter includes "Put on Your Thinking Cap" problem solving exercises and multi-chapter cumulative reviews. 264 perforated pages, softcover. Grade 3. Student Book B.

Math in Focus presents the Singapore approach to math in a way that is easy to use and understand. Available for Kindergarten through 5th grade, Math in Focus: The Singapore Approach is the United States edition of Singapore's most widely used program. Carefully paced instruction that focuses on teaching fewer math topics per year to a level of mastery. Consistent use of visual models and manipulatives that carefully bridge the concrete and the abstract. Encouraging algebraic thinking, facilitating communication of math ideas, and solidifying learning. Instruction centered around problem solving using multiple models to help students visualize and understand the math concepts. Ample practice for continuous ongoing assessment"
