Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

'Definitive, critical and engaging, this is a superb introduction to the sociology of work.' Leo McCann, Professor of Management, University of York Now in a fully updated third edition, The Sociology of Work draws on the work of classic and contemporary theorists, to provide readers with a thorough exploration of all aspects of work and employment, including paid and unpaid work, standard and non-standard employment, and unemployment. The new edition includes: Two new chapters on “Work, Skill and the Labour Process” and “Managing Culture at Work”. Expanded coverage of the rise and decline of trade unions; emotional labour, misbehaviour, and resistance at work. Further discussion of the gig economy and precarious work; automation and the end of work; globalization and human rights. For Sociology and Business students, taking modules in work, employment and society.

BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals, entrepreneurs and corporate executives. Every month, BLACK ENTERPRISE delivers timely, useful information on careers, small business and personal finance.

The McDonald's Corporation is not only the largest system-wide sales service in the world, it is a phenomenon in its own right, and is now recognized as the most famous brand in the world. By providing a detailed analysis of the extent to which the McDonald's Corporation adapts or imposes its labour relations policies in Europe, this volume represents a real life case study revealing the interaction between a global multi-national enterprise and the regulatory systems of a number of different European countries. Key features include: \* an overview of the McDonald's Corporation's development and structure \* an analysis of its corporate culture and the issues of franchising \* an examination of key union strategies, including systems of co-determination, consultation and collective-bargaining \* a chapter dealing specifically with European legislation, in particular the McDonald's European Works Council The author systematically analyzes the conflict between the McDonald's Corporation and the industrial relations systems of the European countries within which it operates, and exposes this conflict as an 'unequal struggle' between economic liberalism and collectivism.

What is strategic HRM, and how do you apply it in business? What makes good HR strategy and how do you develop it? What are the key issues that need to be considered when creating, developing, and embedding a strategic approach to managing people? These are the fundamental questions asked by HR professionals and tackled in this innovative and comprehensive textbook. Drawing on the latest academic research, the well-respected author team

take a reliably thematic approach to SHRM. Broken into four distinct parts, the book addresses the context, theories, themes, and future of managing people strategically. Tata Motors, Samsung, Pizza Express, and Deliveroo makeup some of the case studies and examples that feature across the book, ensuring that theoretical discussion is always linked to practical application. New "Strategic HRM in Action" boxes take this one step further by presenting students with a scenario in which they themselves can make strategic decisions and reflect on their own evaluation of real-life business practices. Critical thinking is essential in SHRM, so frequent Critical Reflection boxes, Review Questions, and questions or activities to accompany every case study ensure students are challenged to engage with the subject critically and reflectively, and consider their own evaluations of the essential theories and the strategic practices adopted by different organizations. Global case studies and an opening chapter dedicated to the global context of SHRM challenge the dominant Western perspective and provide a rounded and adaptable view of SHRM. A user-friendly structure and wide range of learning features, including learning objectives, key concept boxes, and summaries, ensure the text remains accessible, even for those completely new to SHRM, allowing all students to benefit from the book's ideal balance between the latest academic theory and contemporary, real-world practice. The book is accompanied by a selection of online resources: For students: \* Glossary \* Web links For registered lecturers: \* Additional case studies \* PowerPoint slides \* Seminar activities \* Suggested case study answers \* Figures from the book

The Great Recession brought rising inequality and changing family economies. New technologies continued to move jobs overseas, including those held by middle-class information workers. The first new edition to capture these historic changes, this book is the leading text in the sociology of work and related research fields. Wharton's readings retain the classics but offer a new spectrum of articles accessible to undergraduate students that focus on the changes that will most affect their lives. New to the fourth edition"

The fast-food industry is one of the few industries that can be described as truly global, not least in terms of employment, which is estimated at around ten million people worldwide. This edited volume is the first of its kind, providing an analysis of labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries: the USA, Canada, the UK, the Netherlands, Germany, Australia, New Zealand, Singapore, and Russia. The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed. Results reveal that the global fast-food industry is typified by trade union exclusion, high labour turnover, unskilled work, paternalistic management regimes and work organization that allows little scope for developing workers' participation in decision-making, let alone advocating widely accepted concepts of social justice and workers' rights.

The new edition of Crew Resource Management continues to focus on CRM in the cockpit, but also emphasizes that the concepts and training applications provide generic guidance and lessons learned for a wide variety of "crews" in the aviation system as well as in the complex and high-risk operations of many non-aviation settings. Long considered the "bible" in this field, much of the basic style and structure of the previous edition of Crew Resource Management is retained in the new edition. Textbooks are often heavily supplemented with or replaced entirely by course packs in advanced courses in the aviation field, as it is essential to provide students with cutting edge information from academic researchers, government agencies (FAA), pilot associations, and technology (Boeing, ALION). This edited textbook offers ideal coverage with first-hand information from each of these perspectives. Case examples, which are particularly important given the dangers inherent in real world aviation scenarios, are liberally supplied. An image collection and test bank make this the only text on the market with ancillary support. New material includes: international and cultural aspects of CRM; design and implementation of Line-Oriented Flight Training (LOFT); airline applications beyond the cockpit; spaceflight resource management; non-aviation applications; AQP; LOSA; and special issues pertaining to low-cost airline carriers. The second edition editors offer essential breath of experience in aviation human factors from multiple perspectives (academia, government, and private enterprise) and the contributors have all been chosen as experts in their fields who represent the diversity of the research of activities and organisational experience of CRM. The only CRM text on the market offering an up-to-date synthesis of primary source material New edition thoroughly updated and revised to include major new findings, complete with discussion of the international and cultural aspects of CRM, the design and implementation of LOFT Instructor website with testbank and image collection Liberal use of case examples
