$v^2 = w^2 (a^2 - x^2)$ where v is the velocity of the particle, a is the amplitude and x is the distance from O . From this equation, we can see that the velocity is maximised when $x = 0$, since $v^2 = w^2 a^2 - w^2 x^2$

Hence the maximum velocity is aw (put x

Solutions

There are few textbooks of mathematics as well-known as Hardy's Pure Mathematics. Since its publication in 1908, this classic book has inspired successive generations of budding mathematicians at the beginning of their undergraduate courses. In its pages, Hardy combines the enthusiasm of the missionary with the rigour of the purist
